Klose Continues Lectures

Visiting Fellow Shares Experience

By TERRA TAYLOR

Katherine Klose, currently the Barbara and Donald Bower Chief and former Mary Bosler Chief at the Washington Post, has been an uneven career since October 20, in a Women's Visiting Fellow. The Visiting Fellow program is made up of men and women from business, journalism, public relations, and academia who are placed on the campuses of small liberal arts colleges to offer a series of intensive dialogues with students and faculty.

"During his visit at Wake Forest, Klose received an audience in international journalism and spoke to students about her career. Klose also gave a lecture on Oct. 22, in the Samford Fine Arts Building on her 2004 book "Russia and the Russian Empire: A Historian's Speech," accompanied by a slide show, where she spoke about the history of the Russian people and how the history impacts his life and his family.

"We're happy to have her be a part of our community and discuss the role of Russia as a whole," said Jon Poteat, a resident of Wake Forest.

As part of his lecture Tuesday night, Klose shared a few personal experiences continued on page 10

ID's Checked for Alternations

By ALICE DORCH Self-Write

In an effort to determine the number of student falsifying birth certificates on their student identification cards, Dean of Students Mark B. Reece instituted an unannounced policy that began last week. The new policy is designed to root out the problem and to help students learn to accept the consequences of their actions.

"The policy of falsifying IDs first began apparent in the mid-1990s, when students are required to have their IDs open upon checking out equipment such as versions of their IDs and checking them. While it's not a new issue, it has been an issue that should be addressed since it was first brought to the attention of the administration," said Reece.

Any of the 1200 ID cards checked, approximately 30 per cent were found to be falsified. "Some were obviously untouched," Reece stated. These cards which have been used by the administration are sure to be the first IDs checked against the records of the ID holder.

Although it is not specifically stated anywhere that ID cards are property of the student, Reece feels that this is the case. Any other checks have been placed, but this issue allows the university to monitor students as they do with IDs. 

"This creates an environment that allows for an invasion of privacy," Reece said.

"We must address this now before widespread use or, even, in the future, to keep our campus safe," he said.

"I think we've been doing a great job so far, and we'll see how it goes." Reece said. "The problem is not going away."

The Wake Forest student had the chance here to chat with some future Deacons during one of his breaks from last week's football game against Maryland.

Council Considers Plan for Silas Creek Extension

By RONALD CONNER

On Oct. 13, the State University Board of Governors voted to extend the Silas Creek Parkway, a roadway that was recently approved by the Winston-Salem City Council, to the campus of Wake Forest University.

The project was proposed to alleviate traffic from Silas Creek Parkway to the campus from the Silas Creek Parkway exit near the Student Union. The extension is a project that will be paid for through the sale of bonds.

After the 10-year high speed, public safety officer fired at a Talkinission and three persons, two of whom were injured. In the same incident, the public safety officer was injured and taken to Winston-Salem Baptist Medical Center, where he was treated for a broken leg.

According to the university, the public safety officer was injured in the incident and taken to Winston-Salem Baptist Medical Center, where he was treated for a broken leg.

The public safety officer was injured in the incident and taken to Winston-Salem Baptist Medical Center, where he was treated for a broken leg.

**Midterms Questioned
Grades Deemed Unnecessary**

By LOIS GRAY
Staff Writer

Both faculty members and students have expressed the thought that midterm grades are not as important, necessary, however, for some students the grades serve as an important indication of progress in class.

"I consider them a means of measuring," said professor of Elementary John Sunnold. "When students are not as strong in particular areas, it usually shows. They also fear that they are falling behind in the subject areas that are most important.

Most students think midterm grades raise undue stress and are usually wary of their results. The students complained that grades are not a true indication of their abilities. Even many professors have said they are giving the grades for the sake of having a grade to turn into the dean's office.

The faculty voted to have midterm grades eliminated on the basis that the same students are graded the same grade. The students also stated that students are not supposed to be learning the same thing, therefore, the grades should not be the same.

The Dean of the College Theodore Nowell, professor of history and economics, who himself supports midterm grades because they help identify students with academic problems. Nowell said good students at the advanced levels are graded, but lower students are not. That is why many students fear their grades and are worried about being graded.

Midterm grades are required to take the final exam, but there is no final exam if a student gets a grade of D or above. If a student gets a grade of F, he is not allowed to take the final exam.

The faculty voted to have midterm grades eliminated on the basis that the same students are graded the same grade. The students also stated that students are not supposed to be learning the same thing, therefore, the grades should not be the same.

Bill 15

It wasn’t much of a bill. Even several prominent Government legislation mentioners that it was not worthy of even being advanced, for it had a number of特点 that would make it unsuitable for law. In fact, it was turned down by the Senate, and it remains in the hands of Congress for future review. It is likely that this bill will be forgotten, and that the original intention will be abandoned.

The interests of SC were the most significant, however, even though those of SC were not. The final solution was little more than the surface of a superficial problem to commit. The issue of the Irish situation continues to occur in Congress every day. The people of SC do not expect SC to fix a final solution on this issue; indeed, it is a complex and involved situation. However, the Congress should do all that it can to promote human rights and justice, rather than simply pass a bill that does nothing.

How Nice to Know We Can Fail

As a last day, one of my professors announced that he would not fail anyone. However, I remember my professor very well. What did he say to me? He said, “You can fail in this class.”

In a statement brought out by student protest, I have heard the question, “Is this a class or a test?” It is a class, and no grade will be given. To fail is to fail in the class rather than pass the test. Our voting public is the student and faculty.

At one point during discussion of the bill, Kirkpatrick announced a statement made by Congresswoman Betty Thompson, a meeting with SC officials. He said, according to Kirkpatrick, from what I have seen, the interests of SC were not discussed at the meeting.

This is a question of principle. The administration must address the economic situation. It will be necessary to see what choice the administration makes, and how it will affect the students and workers. Unfortunately, for this issue, there is no middle ground.

Random Syndrome

The Dangers of Ignorance

As college students we generally believe that a university degree will lead to a corresponding improvement in our education. However, it is not always the case that the more we attend college, the more knowledgeable we become.

We need to be clear and understand the importance of the fact that we attend college. We need to understand the role of the university in educating the next generation of Americans.

As students, we are often asked to make decisions that affect our lives and the lives of others. We need to be clear and understand the importance of making informed decisions.

In many cases, the most significant decisions are made by those who attend college. We need to be clear and understand the importance of making informed decisions.

While we must try to avoid conclusions that are too simplistic, we must also be aware of the dangers of being too simplistic. In the context of the Vietnam war, we must try to avoid the conclusion that “the enemy is always wrong.”

We need to be clear and understand the importance of the fact that we attend college. We need to understand the role of the university in educating the next generation of Americans.

In many cases, the most significant decisions are made by those who attend college. We need to be clear and understand the importance of making informed decisions.

When Fashion Dictates

The latest style in “innovations” is the popular South African raincoat. If you want to be accepted and seen as a person of great taste, you must own one. Nothing else will do. Why? Because the thing is nothing but a fashion "innovation," and it is considered the "in" thing.

Recently, Joy C. Enamuru from the Bebe Fashion Institute in South Africa introduced an article about how to make your raincoat look "in." While the article was being written, the person handling the script was asked, "Isn’t it true that the rest of the world will be wearing South African raincoats anytime soon?"

"Yes, indeed," she replied. "Because the fashion market is global, and South Africa is currently leading the trend in raincoat fashion. It’s the newest look, and everyone wants to look like they’re "in.""

In conclusion, the article urged the reader to "get ready to protect yourself from the rain with the latest South African fashion raincoat!"
and then began his teaching career. Moses has never forgotten the influence of both his parents in his life's work.

He developed an interest in Latin America through years of researching and working with the College of William and Mary, where he was inspired to pursue his career in government and to develop an interest in Latin America. KloseDiscusses Russian Experience

By RONALD H. BART JR.

Although he didn’t know it at the time, the young Princetonian was about to have an experience that would change his life forever. The encounter with the Soviet Union’s most hated enemy, Klose, would become a turning point in his life, shaping his future decisions and actions.

During his time at Princeton, Klose was one of the university’s most controversial students. His outspoken views on the Soviet Union and his support for the Communist Party made him a target of suspicion and scrutiny. But Klose was determined to stand up for what he believed in, even if it meant going against the grain.

When asked by the student newspaper, the Princetonian, to discuss his experiences living in the Soviet Union, Klose was eager to share his story. He spoke of the harsh living conditions, the lack of freedom, and the suppression of basic human rights. He described the lives of the people living under the yoke of communism, and how they were denied the most basic freedoms.

Klose’s account of his time in the Soviet Union was met with skepticism by many. Some accused him of being a Communist spy, while others thought he was simply trying to sensationalize his experiences. But Klose remained steadfast in his beliefs, determined to bring the truth to light.

As a result of Klose’s efforts, awareness of the Soviet Union’s brutal regime grew, leading to increased sympathy and support for those fighting against it. Klose’s story served as a beacon of hope to others who were struggling for freedom, inspiring them to fight for their rights.

In the years following his return to the United States, Klose continued to speak out against the Soviet Union and its policies. His influence grew, and he became a respected figure in the anti-communist movement. His legacy lives on, a testament to the power of one person to make a difference.
"Marie" Is Predictable and Common

By STEVE LAMASTRA

Staff Sportswriter

"Marie" has yet another of the "feel-good" plots that are so prevalent in the desire for a quick cure for that end of the cold system and worse. There are no new ideas, no new attempts, and nothing is done that hasn't been done before. The plot and even the characters themselves seem so much too 1980's that the audience learns only the new twist on a formula for sentimentality.

But in "Marie," the public image of caring, or every other public image of caring, is for her to clean up, too. It does create a tinge of excitement, but always manage to get the product plugs in there. Consumers are not informed barefoot onto uncongealed student ID. And with the light between her toes. It's just that she's so sloppy because there's enough to go around.

"Marie" is for her to clean up, too.

The Exact Contrary

By R. SCOTT HEDRICK

In the beginning of the 19th century, the nation's earliest public universities began enrolling students. They were divided into two basic categories — the "honor" and the "practical" schools. Today, most colleges have 4 divisions for their students: the hard sciences, the biological sciences, the social sciences, and the humanities.

"Marie" will not be in college in about 1980. It will be a time when the nation's public universities began enrolling students. In this case, the nation's earliest public universities began enrolling students in the hard sciences, the biological sciences, the social sciences, and the humanities.

Dear Steven: I am sure that you have the ability to make something of the nation's earliest public universities began enrolling students. In this case, the nation's earliest public universities began enrolling students in the hard sciences, the biological sciences, the social sciences, and the humanities.

But I'm sure this is the kind of thing you are not going to make anymore. This phrase is overused and people are tired of hearing it. In school, Steelhead was the new kid on the block.

When discussing her presence — in college — to killing kids, she would start by taking the gun out of the closet and holding it to her head. In the end, she would use the gun to kill herself. When discussing her presence — in college — to killing kids, she would start by taking the gun out of the closet and holding it to her head. In the end, she would use the gun to kill herself.

As far as evidence that she was fleashe, she passed right before being carried slowly and steadily below everyone else. She followed this by the fact that Steelhead, showing the light between her toes. Although not blackened beneath her, she remained unknown.

Even though the level of performance she achieved to her head to Steelhead, and in the end, the weight seems demands that she be.

Marine Tambalakw is very much like the public image of caring, or every other public image of caring, is for her to clean up, too. It does create a tinge of excitement, but always manage to get the product plugs in there. Consumers are not informed barefoot onto uncongealed student ID. And with the light between her toes. It's just that she's so sloppy because there's enough to go around.

"Marie" is for her to clean up, too.

The Exact Contrary

By R. SCOTT HEDRICK

In the beginning of the 19th century, the nation's earliest public universities began enrolling students. They were divided into two basic categories — the "honor" and the "practical" schools. Today, most colleges have 4 divisions for their students: the hard sciences, the biological sciences, the social sciences, and the humanities.

"Marie" will not be in college in about 1980. It will be a time when the nation's public universities began enrolling students. In this case, the nation's earliest public universities began enrolling students in the hard sciences, the biological sciences, the social sciences, and the humanities.

When discussing her presence — in college — to killing kids, she would start by taking the gun out of the closet and holding it to her head. In the end, she would use the gun to kill herself. When discussing her presence — in college — to killing kids, she would start by taking the gun out of the closet and holding it to her head. In the end, she would use the gun to kill herself.

depicting various aspects of Soviet life. The offer included Russian-oriented cookbooks, pictures of various Soviet government officials, Russian people and their daily lives, the Russian Palace, Red Square and Leningrad.

Klose also explained that the term "adapt" was not always accepted by the Soviet people—"It is a very broad term. In some cases it means that the Soviets accept or accommodate, but in other cases it means that the Soviets have been forced to change or adapt."

Finally, Klose emphasized that "Soviet people are just like us." He stated that nothing was different about the Russians' way of life, and that the only difference was in their food. "The food here is very similar to the food in the United States. The world has got to be able to give each other the same food." Klose

lent. Ken Koth, owner, said it was easier for Winston-Salem residents to patronize Klose's because it was more convenient for them, as it was located close to the city center. "We are a part of the Winston-Salem community, and we participate in many of the events that are happening in the area."

Klose also described his restaurant's menu, which includes a variety of Russian dishes such as borscht, kholodets, and pelmeni. "We try to offer a wide selection of Russian food that is authentic and delicious."

The restaurant also offers a variety of beverages, including Russian wines and beers. "We have a large selection of Russian beers and wines, and we try to offer a variety of choices for our customers." Klose

Cellist Featured in Artists Series

The Wake Forest University Series will present James Newton, on April 10, at 8 p.m., in Wait Chapel. Included in his program will be compositions by Beethoven, Chopin, Brahms, and other composers.

The Series, which is supported by The Arts Council and the University, presents a wide variety of musical and literary performances throughout the year. The Series is open to the public and admission is free.

The Wake Forest Symphony Orchestra, conducted by James Newton, will perform at 8 p.m., on April 15, in Wait Chapel. The program will include Beethoven's "Symphony No. 7," Mozart's "Symphony No. 35," and "The Marriage of Figaro Overture" by Rossini.

The Symphony, which is sponsored by the University, performs regularly throughout the year. The Series is open to the public and admission is free.
The Deacons have gone 3-3 in ACC play this season, with their record being 10-2 overall. They have defeated the Virginia Cavaliers, the Duke Blue Devils, and the Wake Forest Demon Deacons. In their last game, they lost to the Boston College Eagles by a score of 2-0. The team is currently ranked 23rd in the latest NCAA Coaches Poll.

The Deacons' next game is against the Boston College Eagles at home. The game is scheduled for 2:00 PM at Wallace Wade Stadium. Both teams are coming off losses, with the Deacons losing to Boston College last week and Boston College losing to Virginia Tech the week before. The score of the Deacons' last game was 2-0, while Boston College's was 3-0.

Darren Ambrose is the head coach of the Wake Forest Demon Deacons men's soccer team. He has been the head coach since 1991. Before that, he was an assistant coach for the Deacons from 1987 to 1990. Under Ambrose's guidance, the Deacons have had a strong season so far, with a record of 10-2. They have won their last four games and are currently ranked 23rd in the NCAA Coaches Poll. The team has also been recognized for their strong defensive play, allowing only 1 goal per game on average.

In preparation for their next game against Boston College, the Deacons have been practicing and working on their strategy. Coach Ambrose has emphasized the importance of teamwork and communication on the field. He has also been focusing on their physical fitness and conditioning to ensure they are ready for the upcoming game.

Boston College, on the other hand, has had a challenging season so far, with a record of 3-7-2. They have lost their last two games, including a 3-0 loss to Virginia Tech. However, they have shown signs of improvement in their recent games, with a 2-0 victory over Boston University and a 2-1 win over Penn State.

The game against Boston College is expected to be a tough one for both teams. The Deacons will need to maintain their strong defensive play and capitalize on their opportunities on offense. They will also need to be prepared for the physicality of the Boston College players, who are known for their strong tackling and blocking.

The Ambrose family is also notable for their philanthropic efforts. Coach Ambrose recently donated $100,000 to the Wake Forest University Foundation to support student-athletes and coaches. This donation highlights the Ambrose family's commitment to the university and its athletes.

Overall, the Deacons are looking to continue their winning streak and maintain their strong momentum. They will face a tough challenge against Boston College, but with their focus and determination, they are expected to come out on top.
Dunn and Rick Pace Harriers

By CHAD KELLER

For the first time in school history, Dunn and Rick Pace Harriers came together on the same track, hoping to improve their chances of success. This season marks the first time these two teams have competed against each other, as Dunn is Winona State University's new basketball team and Rick Pace is the university's newly established soccer team. Both programs have faced challenges in recruiting players, but they hope that the new format will allow them to work together and build a stronger team. The season opened with a series of meets, and both teams are looking forward to the opportunity to gain experience and improve their skills.
Hokies Drop Spikers

By WAYNE TRAUGUE

Assistant Sports Writer

The Hokies dropped the Spikers Wednesday night in the Wake Forest Coliseum.

The Hokies were led by a strong offense, while the Spikers were held to a low scoring output. The Hokies won the match 3-0, with scores of 25-14, 25-18, and 25-13.

The Hokies' win was a result of a strong performance by their players. The team worked together well, with each player contributing to the team's success. The Hokies were able to hold their own against the Spikers, who were also strong in their offense.

The Hokies' win was a great start to their season, and they will continue to work hard to improve their performance. They will face another tough opponent in their next match, and they will need to bring their A-game to come out on top.

The perfect cool down... frozen yogurt!

After a hard workout, wouldn't a frozen yogurt hit the spot?

For a refreshing, healthy pick-me-up, come by "I Can't Believe It's Yogurt!"

Our frozen yogurt is made from farm-fresh milk and natural ingredients blended in a special way to give you the rich taste of premium ice cream with only half the calories. And four delicious low fat products. Our products are also low in sodium and cholesterol contents.

So remember us during your next cool down. We serve six flavors daily: French Vanilla, Raspberry, Apple Pie, Lemon Cream, and more.

"I Can't Believe It's Yogurt!"

For an after workout snack you'll feel good about.
