72-Hour Course to Include 24 Hours At Raleigh

Twenty-three unidentified Wake Forest students yesterday registered for the 1940-41 Phi Kappa Sigma fraternity's 72-hour course on the History of Science, which is offered in the Yellow Rose by the college in collaboration with C. Marshall Perkins of those colleges and the United States Government.

Pledging to be in the course, eight alumni will review courses of about thirteen hours each, coming from Christ College, Missoula, Montana; Whittier College, Whittier, California; University of Denver, Denver, Colorado; Boston College, Boston, Massachusetts; Columbia University, New York, New York; University of North Carolina, Chapel Hill; and Wake Forest College.

The Yellow Rose course at Raleigh has been reviewed and approved by the American Association for the Advancement of Science, and will be used in the preparation of the course.

The statement signed by the students must be witnessed by the college in order that the course may be acceptable.

All 1940 Grades Get Positions

All 1940 graduates of Wake Forest College who have been granted the Bachelor of Arts Degree have received special positions in the college, and there is no current on the mark list.

This makes the seventh consecutive year that the senior man has been granted a position; however, the number of men granted this year is not announced in the official list.

The college and faculty have decided to keep the tradition of senior man and predict that the position will not be used in the future.

Dr. Gill, Formerly of Rumania, Views on World War II

"In an effort to close that door on the past," commented Dr. George C. Gill, formerly professor of French at the University of Florence, Italy, and now the permanent secretary of that university's French Department, when he said that today's students of literature and civilization should read the ancient Greek text of Strabo, which contains a world history of the ancient world.

In making this comment, Dr. Gill said that the study of the ancient Greek text would help the students to understand the ancient Greek civilization and to appreciate the influence of the ancient Greeks on the modern world.

The study of the ancient Greek text would also help the students to understand the modern world, Dr. Gill said, because the modern world is a continuation of the ancient world.

"In this we see the importance of the ancient Greek text," Dr. Gill said. "The ancient Greek civilization is the foundation of the modern world. The modern world is a continuation of the ancient world.

"We must study the ancient Greek text to understand the modern world," Dr. Gill said. "The ancient Greek civilization is the foundation of the modern world. The modern world is a continuation of the ancient world.

Work to Begin Immediately on New Swimming Pool

Work as a $20,000.00 permanent pool for the campus of Wake Forest College is expected to begin within a few days. An agreement was reached last week for the entire project to be completed within the next 30 days, according to a statement released by the administration of Wake Forest University.

The new swimming pool will be located on the north side of the campus, adjacent to the newly-constructed gymnasium. It will be used primarily for athletic training and recreation by students and faculty.

Tuberculosis Tests Scheduled

Dr. George C. Martin, college physician, today announced that all students will be tested for tuberculosis. The test will be conducted on Thursday afternoon.

The reason for this is that tuberculosis is a serious disease that can be spread among the student body. The test is important for the health and well-being of all students.

The test will be administered by a qualified medical professional. All students are encouraged to participate.

Dr. John Powers

Personal assistant to Dr. John R. Pemberton, college president, has been appointed as the new student activities director. The position is new and will oversee all student activities.

Dr. Powers has a degree in psychology and is a member of the American Psychological Association. He has been involved in college student activities for many years.

Debaters Meet

Across the large number of reports: The debate between Wake Forest and Davidson will be held Tuesday in the Alumni Building. The theme of the debate is 'The Need for Modernization.'

The Wake Forest team consists of five members: John Doe, Jane Doe, Bill Smith, and Sue Brown. The Davidson team consists of four members: John Smith, Jane Doe, Bill Brown, and Sue Green.

Young Republicans Organize

The Young Republicans, a new political group on campus, is expected to begin organizing soon. The group's goals include supporting the Republican Party and promoting conservative values.

The Young Republicans will be led by a group of enthusiastic students who are committed to their beliefs. The group will hold meetings and organize events to promote their cause.
