WAKE FOREST-FURMAN Debate Wednesday PM

Deacons Lose To Rocky Mount In Opening Game Of The Varisty Schedule

WASHINGTON, D.C.—The WAKE Forest-Furman University baseball team met at the armory in preparation for the opening game of the varsity schedule on Wednesday afternoon. The game was played on the field of the Rocky Mount High School and was the first varsity game of the season. The game lasted three hours and fifteen minutes, with the Deacons winning by a score of 8-1. The following is a report of the game:

The game was played in fair weather and the Deacons took the field early in the morning to prepare for the game. The starting pitcher for the Deacons was E. H. Miller, who delivered an outstanding performance. He went the distance and allowed only one run on four hits, walking none and striking out six. The Deacons won the game comfortably, and the margin of victory was enough to satisfy the home crowd.

The Deacons' offense was led by second baseman R. L. Johnson, who had three hits and drove in two runs. Leadoff hitter J. H. Williams had a strong game, going 4-for-5 with two doubles and three runs scored. The Deacons' catcher, T. B. Martin, had a solid game behind the plate, blocking several wild pitches and framing balls to Miller.

The Rocky Mount High School team was led by their starting pitcher, S. F. Smith, who allowed five runs on seven hits, walking four and striking out three. The Mounties' offense was led by first baseman J. L. Brown, who had two singles and scored two runs. Shortstop H. L. Smith had a solid game, making several fine stops on hard-hit balls.

After the game, the Deacons' manager, J. H. Smith, praised his team for their solid performance. He said, "Our team did a great job today, and I am proud of them. We played a solid game and deserved the victory." The manager also thanked the Rocky Mount High School for hosting the game and the fans for their support.

The Deacons are now 1-0 on the season and are looking forward to their next game, which is scheduled for Saturday afternoon against the High Point University Panthers. The game will be played at 2:00 PM and is expected to be a close contest. The Deacons will be looking to continue their strong start to the season and improve their overall record.

The Rocky Mount High School team will be off until their next game, which is scheduled for next week against the High Point University Panthers. The game will be played at 1:00 PM and is expected to be a tough contest. The Mounties will be looking to bounce back from their loss to the Deacons and improve their overall record.

Commencement Program Has Been Issued

(Continued from page 1)

The Cosmopolitan. His letters have appeared in various magazines and are included in the anthology of The Christian Century and others of the "Master" class. Dr. Paul Brown will deliver the address, graduated from Wake Forest in 1921 and occupied his new position as professor of English in Columbia University. He has been a student at Wake Forest and is at present a general professor of philosophy. Dr. Brown is one of the most promising young philologists of the day.

The Fraternity of older minstrels of the South has a similar program. They are considered as the best and are invited to do so. The program will be held on the last Wednesday of each month at the Fraternity of older minstrels of the South.

Is it time now for the spirit of rivalry between fraternity to cease? Pledge day for the season of 1924-1925 is in the air. The fight over good men from the first year should be at an end and the Greek letter recognitions on the campus should not be the chief battle cry in their fight. If they have any, "Friends and brothers, let us be the fraternity that we are!"

A fraternity can bring out the best or worse in a man. Usually a fraternity is the best, but it has a way to appeal to the best. The two are working to good ends and they have shown this up to a remarkable degree. The rivalry has been lost but not unknown. Some fraternities have been "impotent" on small men but have realized that only good men could get the prized frater and thus it was up to many to decide which group should be elected.

A sense of belonging brings out the latent in the fancier to become a better person. It is at the fraternities that the best men are brought to the surface.

The Faculty and Trustees should encourage several of the best men to install chapters here. And if they have not shown such interest by bringing up the possibility of establishing some of the College property to the fraternity to hold on. This is one of the best incentives to men's societies and chosen of having houses for the chapters.

Chapel As Religious Worship

"Religious opinion is a matter of choice," write those with whom we agree, "the most important aspect of the religious experience is that of voluntary, un broached, and neither..."

The selection at Williams is based almost entirely on the argument that compulsory religion does not augment the religious devotion of those who attend the college. The curriculum and the religious instruction were worked out in a manner...not to whatever religious denomination, or lack of one...

Asked whether required chapel bred a feeling or thought. "SERVICE" exactly quarter to eight every morning to whether required chapel bred religious devotion, this men don't pray but read the ions basis. ance of about religious value: As regards the religious benefits, 1

CHEMICAL SOCIETY HAS GOOD MEETING

C. V. Harrill Hands a Paper on Hydrazine at Regular Semi-Monthly Meeting

At the regular semi-monthly meeting of the Lavender Chemical Society held Monday night, Mr. C. V. Harrill, a member of the Board of Managers, reported favorably on his paper on hydrazine, recently published, and read an excellent paper on hydrazine. Mr. Harrill has made a very instructive presentation, and has brought to the attention of those who are interested in the chemistry of hydrazine and related substances the work which has been done in this field over a period of time. He has shown how hydrazine can be prepared from ammonia and hydrogen, and has brought out the fact that the modern vegetable is not only superior to the old-time vegetable, but is also cheaper in price. He has also shown how hydrazine can be used in the preparation of various other substances, and has brought to light some of the properties of hydrazine which are not otherwise known.
