Job Fair held

By CHRISTY VALENTINO

Eighty companies were represented at Job Fair '84 which was held on Thursday evening in the Student Union. Sponsored by the North Carolina Career Consortium, the event provided an opportunity for Wake Forest students and alumni to meet with representatives of various companies to discuss careers, graduate school programs, and company representatives.

In addition to the on-campus job fair, the Office of Career Planning and Development held a seminar on Tuesday night in the Student Union. The seminar was designed to inform students about the job fair and how to make the most of their time there.

Reagan wins re-election easily

By TED BILCH

As predicted, Ronald Reagan easily defeated challenger Walter F. Mondale Tuesday in the presidential election, receiving an electoral landslide of 525 to 138. The results were confirmed and the victory was made official early Wednesday morning.

While the outcome was not in doubt, the closeness of the race in the popular vote was a matter of some debate. In the electoral college, Mondale carried only the states of Maine and Vermont, while Reagan swept the rest of the nation. The final tally was 525 to 138 in favor of Reagan. Considering that this is the first time in four years that a "good" poll was actually correct, it was a great victory for the Republican Party.

Most recruiters at the fair were satisfied with the numbers of students who attended. One representative expressed concern that the atmosphere at the athletic center was not conducive to interview proceedings.

Laura Christen Ford, former associate provost of Princeton University, has been named the new associate provost at Wake Forest. She will assume the position on July 1.

Ford has served in various capacities at the University of California, Berkeley, and at the University of California, San Francisco, where she was recently appointed as a professor of neurology. She has also served as an investigator at the National Institutes of Health and as a member of the faculty at the University of California, San Francisco.

Ford received her undergraduate degree in psychology and biology from the University of California, Berkeley, and her medical degree from the same institution. She completed her residency in neurology at the University of California, San Francisco, and is currently pursuing a fellowship in neurology at the University of California, Los Angeles.

Laura Ford was born in the University's first associate provost. She is working closely with the provost on the implementation of new programs and initiatives.

Sarah's appointment is a significant step forward for the University. She brings a wealth of experience to the role and will be an excellent addition to the administration.

Overall, the University is well-positioned for continued success in the years ahead.

Vigil held for Barfield

By SCOTT CARPENTER

About 20 Wake Forest students went to a vigil in Davis Chapel at 7 p.m. on Monday night to honor Walter Barfield, who was killed in a car accident last Thursday night.

Walt Barfield, a sophomore at the University, was killed in the accident. The vigil was held to honor his memory and to offer support to his family and friends.

Tenure causes difference in ratio

By CATHARINE PHILLIPS

In the 1984-85 addition of the American Association of University Professors' "Ranking, Wake Forest and Duke University have a small role in the sciences as compared to others in the country. This situation reflects the differences that exist among the schools, including the University of California, Berkeley, and the University of California, Los Angeles.

At Wake Forest, 6.3 percent of the faculty are women, while at Duke, 12.4 percent are. The difference is even greater in the sciences, where 3.6 percent of the faculty are women at Wake Forest and 8.7 percent at Duke.

Planning process for university begins now!

By KATE SMITH

This fall Wake Forest is beginning a five-year process of organizing a new school. This comprehensive process is aimed at making Wake Forest a better university by: 1) examining existing programs; 2) starting new programs; 3) identifying those programs to be eliminated; 4) identifying the departments on campus that are doing well and which ones would be most beneficial to the university; and 5) identifying the campuses that are in need of improvement. This process is being carried out in an effort to make Wake Forest more competitive with other universities and to better meet the needs of the increasingly complex world in which we live.

Existing programs will be reviewed by committees composed of administrators, faculty, and students. The committees will be tasked with the following:

- Evaluating the need for each program
- Assessing the effectiveness of each program
- Identifying ways to improve each program
- Determining the feasibility of starting new programs

These reports will be viewed by the university community, and the university will make decisions about which programs to continue, expand, or eliminate.

Russell Brantley publicizes Wake Forest

By DAWN MAGNUSON

"I like talking about Wake Forest," Russell R. Brantley, Jr., said of his position as director of communications for Wake Forest University. "The challenge of being a communications officer is to present Wake Forest in the public's perspective as directly as possible and communicate the excitement the university has to offer." Brantley has been a communications officer for the university since 1991.

From the office of communications, Brantley composes public relations messages about Wake Forest, its students, and faculty; develops and implements promotional campaigns; and serves as the university's primary spokesperson. He is also the university's primary point of contact for the media.

"These efforts that make Wake Forest" news endeavors such as partnering with Wake Forest students and faculty to discuss the university's mission and purpose, developing and implementing promotional campaigns for Wake Forest, and preparing the university's public relations materials. Brantley's position is the most beneficial to the school, and works with the vendor. This last took place in June 1991.

Many meetings for the enlightenment of students have been held, including those that make Wake Forest more competitive. Russell H. Brantley, Jr., director of housing Ed Brown's curiosity led him to take the job at Wake Forest as he was interested in the institution's future. He and his team have been working hard to make Wake Forest an even better place.

The purpose of the trip is to promote awareness of the university and to encourage prospective students to visit. Russell H. Brantley, Jr., director of housing Ed Brown's curiosity led him to take the job at Wake Forest as he was interested in the institution's future. He and his team have been working hard to make Wake Forest an even better place.

Death penalty examined

By STEVE TONEY

The public safety officer of Wake Forest University has recommended a change in the death penalty laws in the state of North Carolina. This change would allow the university to continue to serve as a model for other universities in the state and to promote public safety.

According to the university's director of public safety, the change would make the university a safer place for students and faculty. The recommendation has been made in response to a recent survey conducted by the university's office of communications, which showed that the majority of students and faculty support the change.

The university's director of public safety has recommended the change to the university's board of trustees, and the board has agreed to consider the recommendation. The university's board of trustees is expected to vote on the change in the near future.
**Wellness lectures continue**

By GREGORY RICE, Staff Writer

The series of Wellness Lectures in conjunction with the new Wellness Center and the Student Health Services (SHS) were well attended and the relationship and the basic psychological pressure to be thin in an intensive manner are actually stressful and effects on academic studies. Studies have been done with specific problems and gave the opportunity to introduce students to the struggle materials and health risks available in the lecture format.

Last night, Dr. Marcia Schacht, the new director of the School of Mental Health and Social Welfare, and College age women with eating disorders were the focus of these problems, and the lecture explored symptoms of what people might expect and the importance of seeking help as a preventative.

Dr. Schacht explained that the pressure of being thinner is causing increasing stress. The lecture was entitled "The Difficulty in Adapting to the demands of college culture and the hidden pressures of the body image."

By focusing on ways of coping with physical and mental health, Dr. Schacht helps to bring balance to the lives of college students.

During the lecture the "relaxation response" was used to help the students to let go of some of their stressful thinking.

Students were asked to bring in their own suggestions and to take breaks during the lecture. The students were encouraged to experience the lecture as an alternate way of thinking about their own situations.

Simple assaults reported

During the past few weeks there have been incidents of simple assault on females in campus. The Wake Forest public safety office needs your help in identifying the location of these.

A female jogger was attacked by a man in black, 20-30 years old, in the wooded area near the Forest dormitories. She is currently recovering.

Campus Crime Stoppers

The support in this area has been increasing and there are no incidents reported for crimes committed on campus.

The campus crime stoppers are available to all students to report any incidents that they may have witnessed. They can be contacted by calling the Winston-Salem Police Department at 722-2948.

The series of Wellness Lectures is continuing and students are encouraged to attend. The next lecture will be on the topic of stress management and will be held on Wednesday, November 14.

**Computer center notes**

By Jean Seaman, Academic Computing Manager

(1) DENG is a PCM utility which is utilized in the process of correctly diagnosing programs written in FORTRAN, PL/1, and PASCAL. These errors can be eliminated, and DENG can be used to run through a process checking for logical errors. There is a Source Level Debugger (SLD) that is not generally available. A source level debugger is available in the Source Level Debugger. If you will be using DENG, you will need to contact the computer science department to set up your own program. Although the SLD is available from the computer science department, the SLD does not have the capability to debug programs written in DENG.

(2) Because of the way that the program assignments have been given, we have been experiencing many problems with the program. Can you have a program that is relatively simple program. Can you have a program that is relatively simple?
Combating hunger

Wake Forest President Thomas H. Hearn, Jr., Student Government Association, and numerous student groups should be commended for taking steps to help provide relief for world hunger. It was especially challenging to students at his open forum on Thursday for students to first become aware of the stark reality that millions of people are starving in the world, and second for students to do something about it.

We are glad to see SG and student organizations answer Hearn’s challenge as swiftly and enthusiastically as they did.

Part of the plan involves a fast by students across the nation in November.
**Illusory defense**

I would like to thank Mr. Silowy for his article "The Victor's Choice for a Nuclear Defense" which appeared in the May 9th and Black, because it gives some of the things that I wish to discuss further. Mr. Silowy's comments and position are not in the least bit new. The American people have heard them many times. One way to build it is by a continued buildup of nuclear weapons; the other is by a reduced buildup of nuclear weapons. It seems to me now that the most reasonable position is the latter. The American people have heard the same thing for a long time. It is nonsense to say that the United States and the Soviet Union are not going to build more nuclear weapons. The American people do not believe that. Mr. Silowy tells us that the proposed programs of Strategic Defense Initiative, better known as "Star Wars," is the answer to the arms race problem. I disagree for two reasons: it will not work and it is destabilizing.

There is no reason to believe that the United States has the technological "Know How" to build Strategic Defense Initiative. Mr. Silowy tells us that this program is beyond our technological capabilities. Contrary to this, in his statement to the United Jewish Appeal, Mr. Silowy says that he has heard that this system is in development by as many as 12 percent of all inelastic submarines during a weapon strike. We have not heard this from the United States. The Soviets have a higher proportion of all inelastic submarines. The United States has not. The problem is the same. We have not heard about this. Mr. Silowy is quite right in saying that there is an alternative because one percent of all inelastic submarines during a weapon strike will make this program acceptable. It is not in the least bit new. The American people have heard this before. They have heard that Strategic Defense Initiative is not a good idea. Mr. Silowy is not new in this area. He is not new in his statement to the United Jewish Appeal.

There is no reason to believe that the United States has the technological "Know How" to build Strategic Defense Initiative. **Racist fallacies**

This week the Old Gold and Black received several pamphlets from local African American political organizations. The pamphlets contain the usual fare of political activity, the usual fare of the American political activity, the usual fare of the American political activity, the usual fare of the American political activity, the usual fare of the American political activity.

There is no real difference between the way in which people feel about the American political activity. The differences lie in the fact that some people feel that the American political activity is not as good as it could be, and some people feel that the American political activity is as good as it could be. Some people feel that the American political activity is not as good as it could be, and some people feel that the American political activity is as good as it could be.

**Mondale's dignity**

On a cold but sunny day in August, Mayor, late in September, 1984, Walter Mondale announced his candidacy for the Presidency of the United States. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country. He is the most powerful and important executive officer in the country.

**Clairification**

In last week's article "James A. Brown," some inaccuracies should have been corrected. The author, James A. Brown, president of the Lawrence School of Social Work, reported that the Lawrence School of Social Work is not affiliated with or managed by the University of Minnesota. However, Dr. Brown is a member of the University of Minnesota faculty. The Lawrence School of Social Work is an independent institution.

**Art expert teaches and advises**

By LISA HARMAN

Professor of art history Terence B. V. Pinnock has expressed support for the plan to locate the College's Museum of Art in the former Princeton University library. Pinnock said that he was one of the few professors who had expressed enthusiasm for the project, and he had taken this position because he believed the College had a responsibility to maintain a diverse collection of art and to make it available to the public.

Pinnock's commitment to the project has been evident in his teaching and in his research. He has taught courses on the history of art, focusing on the Middle Ages and the Renaissance, and he has contributed articles to scholarly journals on these topics. His research has focused on the development of the Baroque style, and he has been particularly interested in the work of Bernini and Caravaggio.

Pinnock's support for the project is not solely based on personal interest, however. He has emphasized the importance of art in the modern world and has argued that the College has a responsibility to provide access to high-quality art for students and the wider community.

**Villlela dances soon**

By JANA HARRIS

On Friday, Nov. 30, at 5 p.m. in the Alexander Hall, Edward Villella will be premiering his new dance, "The Devil's Waltz." Villella is the most decorated dancer in the history of the New York City Ballet, having received five Kennedy Center Honors, three special Tony Awards, and numerous other prestigious awards.

Villella's new work, "The Devil's Waltz," is a modern piece that explores the theme of redemption. The dance is set to a score by the late composer, Philip Glass, and it features a large cast of dancers, including Villella himself.

Villella has been a fixture of the New York City Ballet for over four decades, and he has been a leading advocate for the arts. His new piece is an indication of his continued commitment to innovation and to the importance of dance in our society.

**Actors confronts nukes**

By V. FERENCZI-SCHWARZ

The new movie, "The Nuclear Option," directed by Richard C. Johnson, is a powerful indictment of nuclear proliferation. The film follows a group of international diplomats who are attempting to negotiate a non-proliferation treaty, but they are confronted with the threat of nuclear terrorism.

The movie is a thought-provoking exploration of the complex issues surrounding nuclear proliferation and the need for international cooperation to prevent a nuclear Arms Race. It is a must-see for anyone interested in world affairs and international relations.
Senior James Garrison performs his duty of decorating lamp posts on the Quad following a Wake Forest victory.

Garrison's role involves placing blue and white balloons around the lamp posts on campus.

"It is very important to me to have a visible representation of our university spirit," Garrison said.

The balloons are an integral part of Wake Forest's tradition, dating back to the 1950s, and are used during home football games and other significant events.

Garrison, a senior business administration major, began his involvement with the tradition as a freshman.

"I found out about it in my first year and thought it was a great opportunity to be a part of something so meaningful," Garrison said.

The balloons are believed to bring good luck to the Wake Forest football team, and Garrison takes pride in ensuring they are properly displayed.

"I am happy to contribute to the tradition and uphold its significance," Garrison said.
By JON ANDERSON

With just two games remaining, Wake Forest travels to North Carolina this weekend for the final meeting of two teams that would not give each other much. Coach Bill Dooley has built a football program to the point where he is the nation's first winning coach of the past five years. The Blue Devils in Wallace Wade Stadium. Remaining winless in the Atlantic Coast Conference, Duke last Saturday as they trounced its back-up, sophomore Mike Peacock, is leading the rushing game and they were able to take an interception in the statistics, he also help many Wake Forest linemen. Though Burgess may not be looking for wide receiver powered by two outstanding inside backs, he will be looking for wide receiver with two spectacular outside backers.

It's a dream come true for Wake Forest's seniors. As Burgess said, "This will be your last home game and you�ve got the opportunity to be in front of a crowd of 35,000 screaming fans. That's kind of a big thrill as earning a four-year scholastic award and the Deacon's Sticksters mature throughout the season.

By JEFF BRACH

The Wake Forest women's field hockey team began its second tournament play with an upset victory over the University of Illinois last Saturday to begin the fall season of the ACC Intercollegiate. The Deacon Team finished out the season with the ACC Championship. The team was matched up against the Deacons, in the first round, in the Atlantic Coast Conference.

For the Wake Forest women's field hockey team, the season consisted of a good year with a win over The University of Illinois. The Deacon Team finished out the season with a win against the Illinois. This year, the team was matched up against the Illinois and they had a great year with a win against the Illinois. This year, the team was matched up against the Illinois and they had a great year with a win against the Illinois. This year, the team was matched up against the Illinois and they had a great year with a win against the Illinois.
Terps lead stats

With only three weeks remaining in the 1984 Atlantic Coast Conference football season, it's beginning to appear that this isn't going to be one of those records set just for an all-time individual statistics is concerned in a program.

A look at the negatives side is a little different story. It looks like the teams that will likely pad the ACC's defensive stats is going to be the same teams they have done. This is especially deadly in total and scoring defense and maybe an scoring offense.

Only once in the past 11 years has an ACC team recorded a better average of more than 30 total yards per game in defense, and Maryland's current figure of 18.9 is the biggest of the last 11 seasons. The score is in total yards per pass, and the Terps' average is 22.8 yards per pass. Maryland has the top average with 40.2 total yards per pass defense. Maryland has the top average with 40.2 total yards per pass defense.

Although three teams are averaging better than 20 yards per pass, it is the most yards per pass defense. The Terps have the fewest interceptions in the ACC and the Terps' average of 2.39 is the lowest in the conference. Maryland's average is 2.66 average and is 3.12 average per 100 yards per game, and they figure in at 2.7 per 100 yards per game. (This doesn't count the 3.12 average per 100 yards per game. (This doesn't count the 3.12 average per 100 yards per game of the Deacon players in the lineup.

Although the Deacons still have some games to their name, they will be playing against Georgia Tech, and the is the first time in seven years that the two North Carolina rivals, N.C. State and the University of North Carolina.

The Deacons faced off against the Wolfpack last February. The Deacons went into the match with a minus one per game and took that into the first per game that the Wolfpack won.

"We played the match without one of our top forwards, so that's one area that I have to work on some of my teams," Kennedy commented. The lack of scoring punch and the insurmountable of many of the Deacon players in the line showed as the Wolfpack shut out the Deacons 3-0.

State first goal came 10 minutes into the match when senior defender John Humme took a pass off the record at 1982's ACC. Freshman Tom Thames has become the first Deacon to appear in national statistical rankings, the ranks 29th in minutes per game with a 31 mark.

Why It Pays To Check Out 1st Base Software

At last, 1st Base Software from McGraw-Hill unlocks the real power of your home or business computer with affordable ready-to-run, database managers. Check these features:

1. If specific applications packages—tailored to your individual needs, whether you’re a businessman, collector, teacher, investor, professional, homemaker, retailer:

   a. Each program is so easy to use, you can be up and running in no time. Enter information, revise it, and rearrange it with just a few keystrokes.

   b. Powerful sorting and selecting features—hides deep—make it a breeze to retrieve information any way you can imagine, on your computer screen or in printed reports, lists, and even labels. A merge feature lets you blend all Base data right into word processing.

   c. Even first-time database users find 1st Base Software so easy to use, to use. Our unique package tells you what each program does and how to use it. Browse through the user manuals to find out still more.

2. Personal, business, income tax, record collection manager...

   a. Available for: IBM PCs and compatibles, Apple II - 40K, TRS-80, IV, II-

   b. The best news is the price: just $29.95 for each package in the Home Series and $49.95 for each package in the Business Series.

   c. The sophisticated, affordable software you've been waiting for is now here. See 1st Base Software today.
