Graduation speaker will focus on Internet

By Alix Means
Old Gold and Black Reporter

John Chambers, the president and chief executive officer of Cisco Systems Inc., will deliver the university’s commencement address May 15.

Chambers earned his bachelor’s degree from Wake Forest University in 1976 and his master’s degree from West Virginia University in 1984.

Along with being a member of President Clinton’s Cabinet, Chambers was named to his current position as CEO in 1995.

Previously he worked eight years at Wang Laboratories and spent years with IBM.

During his time at Cisco, the company’s annual revenues have grown from $1.2 billion to a current $34 billion.

The university debate team just completed their 2000 season with a total of competitions and looks forward to a successful performance in the future.

In addition, Alix means, the director of debate and an assistant professor of communication, the team consisting of junior West Lins and senior Cicily Cox has secured through tournaments at Boston University, taking places Jan. 22-24, and North Carolina State all the way to the Eastern Regional Championships.

Additionally, the combination of senior Tracy Johnson and Laura Mitchell reached the finals of the nationals, the deciding game of 15 during the tournament’s final round.

The team consists of Tracy Johnson and Laura Mitchell, the team of sophomore Andrea Wilson and freshman Robert Powell won the first match of the finals, and the team of freshmen Becca Easte and Keisha Carpenter finished in third place.

The team of sophomore Andrea Wilson and freshman Robert Powell won the first match of the finals, and the team of freshmen Becca Easte and Keisha Carpenter finished in third place.

Symposium explores role of women in science

Multiple speakers discuss the importance of female faculty as well as issues concerning education and careers.

By Jodie Reiss

Covering Scheme

In accordance with the university's "Year of Science and Technology," Olin Physical Laboratory played host to a symposium on women, science and technology.

Sherry Druzin, the science reference librarian at Z. Smith Reynolds Library, organized the event.

Druzin believes that the symposium is necessary in order to facilitate discussion regarding women scientists and their place in the profession.

The two days began Feb. 21 with a lecture by Mary Frank Fox. Fox is a professor of sociology at the Georgia Institute of Technology, where she presides in the School of History, Technology and Society.

Her talk included a close partnership with the American Association for the Advancement of Science and co-authoring the book Women at Work. Fox spoke about the role of women in undergraduate and graduate scientific programs.

"The representation of women faculty is important to both the climate and community of the university and the development of students," Fox said.

She also said that this representation is particularly important for graduate students because the nature of graduate echelon has the potential for faculty to have an even greater impact on students through extensive polling and research.

Fox studied the similarities and differences between the manner in which male and female faculty organized and conducted their classes. She focused particularly on the dynamics of faculty advising. She found that, among other things, women faculty have more female advisees than male faculty but still retain many male students as their fellow male advisees.

For attributed this occurrence to the tendency for female faculty to have larger advisor groups.

Fox addressed this occurrence to the tendency for women to have larger advisor groups.

"There is a trend of women faculty to have more students from a heightened awareness of the women's faculty's position," Fox said.

A reception in the library followed Fox's lecture.

The symposium continued on Feb. 22 with a lecture by Christine Rosser, a dean of the Ivan Allen Col­leges at Emory University, who spoke about the effects of gender on humanities, the social sciences and women's studies.

Rosser authored a book dealing with these subjects, "Reconstructing Feminist Studies: Women as Scholars in the National Science Foundation."

The symposium continued on Feb. 23 with a speech by "Medicine for the Millions," an international health program. The event was co-sponsored by the American Association for the Advancement of Science and the Georgia Society.

Durren believes that the symposium is important for the climate and community of the university and the development of students.

"It is important for the climate and community of the university and the development of students," Durren said.

Yet?"
Debate

Continued from Page A1

The debate teams, showing at the Northwestern tournament, held Feb. 11 and 12, also hosted the Owen L. Coon Debate Tournament, which was particularly impressive.

In one of the largest and loudest tournaments of the year, the tournament contained virtually everyone who will be at Nationals, "Louden said and to Nationals this may be the most important tournaments of the winter." Louden noted that the showing of Covey and Louden was perhaps the most important team at Nationals, "Louden said. "Next year's team was important for an additional reason: "It is also the last tournament before submission of first round applications. As a result, they finish at the tournament often makes the difference between making the top sixteen or not," Louden said.

Both the teams of Covey and Louden as well as of Hargis and Archbold received their automatic bids to the National Debate Championships that will take place at the University of Mississippi in March.

However, Louden does not expect the automatic invitations to affect the outcome of the Nationals, "It typically places them among the favorites which helps, but later in the tournament as the field narrows nearly all the teams are of this caliber," Louden said.

Debate and basketball

In explaining the level of competition any team expects on the road to the National Debate Championship, Louden utilizes an analogy that all university basketball teams normally do.

"Much like the first rounds of the NCAA basketball tournament, contains a mix of teams, and the final is all tough. Similarly, the outcomes of the national tournaments are all very different," Louden said.

The university debate teams must not be late with preparation when they begin their quest in Kansas City.

Louden described the three weeks prior to the tournament as a series of strategy sessions as which the teams will devise their "game plans" and prepare for possible scenarios that could arise against some of the stiffest competition.

Also, the teams will be spending spring break meeting and strategizing in preparation for Nationals.

Planning a strategy

Louden seems to hold high hopes for his teams in the National Tournament.

"They have a realistic shot at winning Nationals. As in most seasons there is a cadre of about eight teams that will be favored to compete in the semi-final round and another twelve or so that have darkhorse status," Louden said.

The varsity debate squad received a nice surprise when the latest rankings were released Feb. 15, the university boasts the third best varsity debate program in the country, trailing only Emory University and the University of Texas Austin.

"I was a little surprised and obviously pleased. I expected we would be in the top seven or so, but third is certainly surprising. The ranking is more reflective of the program does an excellent job," Louden said.

Young winners

The depth of the program can be clearly seen in the fact that the team of sophomore Christ DeVaux and freshman Patrick Speck was able to advance to the third group to represent the university at Nationals this weekend at the regional qualifier.

The squad debate program could be among only six teams to send a third team to vie for the National Debate Championships. The elimination debate will pit the best two teams from the regionals, held at Northwestern University March 1-7. The semifinals include Lindsay Atchison, Paul Piccolo, Powell, Keesop, Eaton and Speck.

Friends of GSSA strive to promote open discussion on themes of sexual orientation and equality.

By Laura Ween

A new support group called Friends of the Gay-Straight Student Alliance held its first meeting at a showing of "Sisters," a film dealing with people who live with HIV/AIDS. Founded this fall, Friends of GSSA is a group for alumni, faculty and staff who want to support ongoing, both morally and financially, the GSSA.

GSSA has been growing in both influence and size on campus. Perry Patterson, the GSSA faculty adviser and a professor of economics, said that there are 120 people on the GSSA listserve and attendance and strength of the group is growing each week. "We are the anticipate we've ever been this year," Patterson said.

It is no surprise, then, that the group is trying to reach beyond their regular membership to other student groups that are not being reached on student government funding," said Patterson. "Friends of the Gay-Straight Student Alliance held their first meeting today and are excited about the future of their group. The group includes the Gay-Straight Student Alliance (GSSA), which seeks to promote open discussion on themes of sexual orientation and equality.

The film shown by the group was sponsored in part by Student Health Services, the counseling center, the department of women's studies, the theater program and GSSA.

The thing that made it special was that we had Ken Frazelfe there," Patterson said. Frazelfe, an attorney at the North Carolina School of Arts, talked afterwards about the movie for which he wrote the score. The film explained that with a healthy group of people living with life-threatening diseases such as AIDS, "It was a great opportunity for support and people in the community to see a real world accomplishment from the gay community," and Jean Regan Hamilton.

Upcoming events in which GSSA will be involved in the future include the annual Greek banquet, which runs from March 27 to 31 and the annual Greek banquet March 20th. GSSA is working with every member of the group to win back new members or people who are simply curious about the group. This week Parents and Friends of Lambda Chi and Gamma Chi came to see GSSA and two weeks ago an IBM representative came to talk about job opportunities.

Senior, pledges recognized at annual Greek banquet

Banquet traces its history to efforts to remove the impression that Greeks do not care about academics.

discussion of social issues, we need to look at all voices, including those that are historically and historically silenced," said Professor Charles Curtis, who is teaching a course on the Johnson administration. "Free speech is not just a right, it is a tool that we can use to protect the rights of others."

Curtis said, "Free speech is not just a right, it is a tool that we can use to protect the rights of others."

A tough call

Removing a speech case from the docket is a difficult decision. For example, the KKE case was difficult to process, but it was protected under the First Amendment. "That should not be taken to mean that speech is always right, but it should be protected," Curtis said.

Similarly, groups proposing housing discrimination are protected under the First Amendment. Recently, on an even more complex case, the university was able to remove the case from the docket because of a procedural issue.

The case is now under review by the school's committee on housing discrimination.

If we have members of the university community that want to express their opinions, we need to listen to them," Curtis said. "That is why we must find ways to protect speech within the law."
Wake Watch

What is the story behind President Thomas K. Hearn's new academic regalia that President Thomas K. Hearn wore to Benson Hall in a ceremony coinciding with the opening of the Flow House last October.

What do students who are staying on campus for all or part of spring break need to do so that they will have permission to stay — or not?

A problem server has been removed and shut down.

When will A.G.O.R.A. packets be available and what is the basic schedule for the room selection process for housing for the 2001-2002 academic year?

"Guide to On-Campus Room Assignment" packets will be available to Resident Assistants March 12, announced Nancy Frady, the coordinator of administrative operations for Residence Life and Housing.

The actual room selection process will begin on March 24 when applications to live in Polk Residence Hall are due, and will continue on April 14 when the YTC Assisted Assignments are to be turned in to R.L.H.

What is the story behind Wesley Kilbourne's concert in Pugh Auditorium to raise funds for Information Systems with tape. He was cut free and taken to the hospital where he received a neck brace.

After unusually high traffic was reported to the Internet and e-mail server that someone had hacked into the illicit server, the university turned off the server they had hacked into.

“Off the Wire”

Raleigh, N.C. — As the 1997 spring semester drew to a close, the Carolina's National Sigma Nu fraternity needed to replace its leaders, as students who were involved in the case had either engaged in an illegal computer crime or were suspected of participating in an illegal上网 crime.

The Carolina's National Sigma Nu fraternity is a social fraternity founded in 1848, with chapters throughout the United States. The fraternity is concerned about the alleged illegal computer crime and is working to ensure that the fraternity maintains the best possible image for its members.

EVANSTON, IL – A high-profile educator isn’t necessarily achieving a high income in the future. That’s the finding of a study by the National Bureau of Economic Research.

The study concluded that smart people will one day earn more than others by "highly selective" schools or less, and that the data from the Arthur M. Okun Foundation. A study of the cost of secondary education reveals that students who were invited to private schools would be more likely to become highly selective students.

"How hard you work and what you do in the long run," said Dole. For the study, Dole and his partner, Alton E. Corwin, surveyed more than 140,000 students who graduated from 100 colleges. Dole and Corwin surveyed graduates from "highly selective" and "non-selective" colleges and universities.

On average, white adults who graduated from highly selective schools, which are at least 10 times more selective than the average college, tend to have a higher income than their counterparts who did not attend highly selective schools.

"We're looking at the income of people who graduate from highly selective schools, and we're seeing a very strong positive relationship between income and the selectivity of the college they attend," said Dole. "We found that students who attend highly selective schools tend to have higher incomes after graduation, and the income gap between students who attend highly selective schools and those who attend less selective schools is even greater when we control for other factors such as family background and college major.

"Our findings suggest that attending a highly selective college can have a significant positive impact on career success," said Dole. "However, it's important to note that other factors, such as family background and college major, can also play a role in determining career success. Therefore, while attending a highly selective college can be beneficial, it's not a guarantee of success. It's also important to consider the cost of attending a highly selective college, which can be quite high. Therefore, students should carefully consider their options and make the best decision for their individual circumstances.

"In conclusion, our research suggests that attending a highly selective college can be beneficial for career success, but it's not the only factor that matters. Other factors, such as family background and college major, can also play a role in determining career success. Therefore, students should carefully consider their options and make the best decision for their individual circumstances."

Equality torch has been passed ... and dropped

M inistering the Ecumenical Council at Westminster Abbey, including the archbishop, was a great way to spend a Friday night. There is one event that is particularly pleasant so, is that Wait from the community, faculty, staff and students - a large extent of students - students who decided that going to Mumford's, a few things of the series. That was, in fact, why we were spending a Friday night. It's great that students went out to a multiversity event for entertainment on the weekend. However, they seem to have missed a more timely and significant event at Winston-Salem State University. A panel discussion scheduled from 7:30 p.m. to 9 p.m., Feb. 23 was part of the "Leadership in Civil Rights: Retrospective and Prospective Perspectives" symposium that celebrates the 40th anniversary of the sit-in at Winston-Salem State, one of the most successful and cooperative sit-ins in the United States. During the Winston-Salem sit-ins in February 1960, 10 students from this university participated in the peaceful protest against segregated lunch counters. There were no other protests, 11 of whom attended Winston-Salem State University. Those students were the first white people to eat lunch while participating in a sit-in protest.

These students were not the only ones who were included in these events, there were fewer faculty and administrative support members among students in attendance. In 1960, the members of the administration, including Harold Tripple, then the president of the college, fought to keep the 10 students from being evicted from the college. They were very supportive of the civil right movement back then.

The faculty and administration of the university did not support Students at Winston-Salem State did not have the same impact on the campus as those at other universities; there were even fewer faculty and administrative support members than students in attendance. In 1960, the members of the administration, including Harold Tripple, then the president of the college, fought to keep the 10 students from being evicted from the college. They were very supportive of the civil right movement back then. In 1960, the members of the administration, including Harold Tripple, then the president of the college, fought to keep the 10 students from being evicted from the college. They were very supportive of the civil right movement back then.

The campus took place in the auditorium at Winston-Salem State, a venue that is not very well attended and is approximately one-third full. Very few students seemed to be interested in this important event - a lack of interest that likely contradicts the active role students took in 1960. A common sentiment throughout the panel members' speeches was that this generation's students need to continue the fight for equality; they are passing the torch to us. They took the march long a way, but we have it to further. It is not a few students who were interested in this event and it shows how much attention we do by equal to rights. Students are not the only ones who encountered these issues, there were even fewer faculty and administrative support members than students in attendance. In 1960, the members of the administration, including Harold Tripple, then the president of the college, fought to keep the 10 students from being evicted from the college. They were very supportive of the civil right movement back then.

The controversy over the possible return of Eliot to the campus in July has been thick with issues. It is also an inaccurate illustration of the arduous role of propaganda as often employed by restorationist movements, irrespective of the ultimate conclusion of this tragedy, Field Castro has been the big winner.

Thoughts are divided by intellectuals regarding the return of Eliot to the campus in July has been thick with issues. It is also an inaccurate illustration of the arduous role of propaganda as often employed by restorationist movements, irrespective of the ultimate conclusion of this tragedy, Field Castro has been the big winner.

To be sure, legitimate arguments can be made that Eliot should be returned to his father in Cuba, but the mainstream liberal media and most Americans seem to have forgotten that Castro's nation is a tyrannical communist dictatorship.

The controversy over the possible return of Eliot to the campus in July has been thick with issues. It is also an inaccurate illustration of the arduous role of propaganda as often employed by restorationist movements, irrespective of the ultimate conclusion of this tragedy, Field Castro has been the big winner.
Accusations of racism hurt professor

A former student's mass e-mail campaign hurts all who are involved.

"S

ickies and stones can break my bones but words can never hurt me" — What a myth.

Words can hurt — badly. They can hurt deeply and last just feelings. They can be related to the hurt. They can cause a university and individuals a lot of time and money.

Christy Buchanan

Guest columnist

They have the potential to ruin lives. I have learned this painfully over the past four months, as I have been the victim of a campaign of malicious harassment. So great have been the recipient of the messages attacking me, Others of you have nothing whatever about this. But the words have been spread so far and wide that I feel I must bring my story into the open, to clear my reputation and name.

Last August, Michael Louca received a master's degree in psychology from this university. He was research assistant throughout his two years in the program. I worked with him closely on several research projects and taught him in one class. I spent many hours in the office with him. He did much of my statistics help in that class. He was my research assistant throughout his time in the program. A number of times I feel I know about the issues he is interested in and he always offered to help me.

When he faced certain frustrations (e.g., if he was often feuding with his colleagues), he frequently turned to his fellow students or me. He would ask for my advice or feedback about situations. He would share his ideas and concerns with me.

Louca had a reputation for being a hardworking student, both in and out of the classroom. He was known for his dedication to his studies and his passion for psychology. His research projects were often cited as being innovative and well-conceived.

In October, Louca sent an e-mail to the dean of the Graduate School of Arts and Sciences, Gordon Melson, falsely accusing me of treating him unfairly. He did this to gain sympathy from his peers and to avoid being expelled.

The accusation was false and malicious. It was made by someone with an agenda, most likely someone who wanted to harm me or my reputation.

Louca's behavior demonstrated a pattern of behavior that was typical of the person he portrayed in the e-mail. He was known for making malicious and anonymous comments about his classmates and professors.

The university human resources office formally investigated his complaint. The investigation centered on the accusations that Louca had made against me.

Louca falsely accused me of making hurtful and untrue comments about him. He quoted a couple of e-mails that I had written to his colleagues, and he claimed that these e-mails were evidence of my treating him unfairly. He also claimed that I had made racist remarks about him.

In one e-mail, he accused me of making racist comments about him. In another e-mail, he accused me of being a racist and a homophobe.

In a forum of free speech, the truth will always reveal itself. When a homosexual was targeted by a racist, he was always the first to be targeted.

I have been passionate about the issue of hate speech. I have been an advocate for its elimination. I have been an opponent of any form of hate speech.

I am confused by the way the university tried to handle this situation. It was not clear how they were going to resolve the issue. I was not sure if they were going to take any action against me.

I have been a victim of this type of harassment before. I have been targeted because of my race, my sexual orientation, and my political views.

The university administration has failed to address this issue. They have not taken any steps to prevent further incidents of harassment.

I have been a victim of this type of harassment for many years. I have been a victim of this type of harassment in my personal and professional life.

When Jeanne Simonelli, the chairwoman of the anthropology department, came to this university and began talking to her students about her program that gives students a chance to study in one of the most scenic regions of the United States, she was a little surprised by the enthusiastic response she received.

"It’s hard to talk about a destination that wouldn’t make anyone want to sign up," Simonelli said. "You can’t beat the beauty of the southwest United States. And we’re going to be spending a month in the desert, so the weather will be ideal." She continued, "I’m excited to see what students will think about the program when they return." Simonelli said that she has received a number of inquiries from students who are interested in participating.

The Southwest Summer Program is a four-week field program that begins on May 24 in El Paso, Texas, and continues on to Chaco, New Mexico. The program is designed to give students the opportunity to study anthropology in one of the most scenic regions of the United States.

"It’s a unique opportunity to study anthropology in one of the most scenic regions of the United States," Simonelli said. "Students will be able to see and experience the rich cultural history of the southwest and learn about the indigenous peoples who live there." She continued, "The program is designed to provide students with a hands-on experience in anthropology, and it’s perfect for students who are interested in the field." Simonelli said that she has received a number of inquiries from students who are interested in participating.

The Southwest Summer Program is open to all undergraduate students who are interested in anthropology. Applications are due by March 3.

After arriving in El Paso on May 24, students in the Southwest Summer Program will head to the University of Texas at El Paso for the first week to study the culture and history of the region. The program will then continue on to the University of New Mexico in Albuquerque, where students will study the culture and history of the Navajo Nation. The program will conclude on June 21.

"It’s a unique opportunity to study anthropology in one of the most scenic regions of the United States," Simonelli said. "Students will be able to see and experience the rich cultural history of the southwest and learn about the indigenous peoples who live there." She continued, "The program is designed to provide students with a hands-on experience in anthropology, and it’s perfect for students who are interested in the field." For much of this season, the Demon Deacons' (14-13, 4-1 ACC) much-maligned offense has been as invisible to score. In fact, going into their current series against the Tribe (11-18, 0-7 CAA) at Old Dominion, the Deacons had scored 79 points in 18 games, an average of just over 63 points per game, and had finished in last place in the ACC. Neither of these patterns held, however, in the Tribe's 86-78 victory over the Deacons on Saturday.

Deacons pull within striking distance of Maryland, but can't overcome the deficit. See story, Page 82.

Blue Devil's fourth consecutive regular season ACC championship. Deacons started off the Deacons into brick wall and, but overall, in one of which the Deacons were visibly outmatched. The loss dropped the Deacons to 14-14, 4-1 ACC play, Duke, ranked No. 2 in the nation, improved to 23-5 overall, and 15-1 in the conference.

Junior center Elton Brand and Duke with a career-high 34 points, including five-of-nine from behind the arc. Brand's performance overshadowed another outstanding performance from Deacons sophomore Dante Songaila, who fought double-teamed and surrendered six runs to Liberty. The rest of the team must have felt confident too, even though they beat us last year and they scored more than 60 points in each of his last three games.

Senior forward Chris Carter extended the lead to 8-2 win, as the pair continues to find Duke defenders Shane Battier and Nick Horvath are draped on him, scoring more than 19 points for Duke, and freshman point guard Antwan Scott and Songaila, who fought double-teams and scored more than 19 points for Duke, and freshman point guard Antwan Scott and Darius Songaila. At the bottom of the fourth inning, Borrell stepped to the plate with two men on and the score tied at 7. In a two-run tiebreaker, he stepped to the plate with two men on and the score tied at 7. In a two-run tiebreaker, he

Junior Danny Borell hit a game-winning home run to lead the Deacons complete a dramatic 9-7 comeback against Liberty.

Borell has hit 27 points this season and has provided leadership for the Deacons. After putting himself and his teammates in a big hole against Liberty Feb. 10, junior Danny Borell stepped to the plate and dug them out.

Deacons stumble to season's end

Junior Corey Stricklin fouls off a pitch to stay alive in the Deacs' Feb. 16 win.

By Jordan Webster
Old Gold and Black Reporter

For all of you who missed my columns last week (and by "all" I refer to my five domestic readers and my latest international subscriber), my internet antagonists, in real life, I decided to take the first requisite step out of every one of you in the hope that it might be fun for everyone to be reintroduced to my world. Sometimes optimistic pre- diction, I realized that I would have to deal with me to have a few last times and in the same way, make my own voice seem slightly less controversial by comparison. That said, let's get into the game.

While the men's hoops season might not be over quite yet (although you can basically stick a fork in our own beloved underachievers), I do not feel that I am prematu- re in announcing my own all conference selections at this time. Part of the reason I have decided to go ahead and release this sensitive information slightly ahead of schedule, despite pleadings from the ACC offices that any news about the all conference selections should remain confidential until after the official announcement, is just simply unable to focus on the plight of the Demon Deacons for more than a few moments at a time. In reality this year, there was no way any team could top the Tribe in terms of success for grades, as a certain conference dominating No. 9 ranked team in the country basically had both hands on two spots from the start of the season. Wow! Such a surprise, I know, and even I wasn't surprised when two Blue Devil players took30 something, yet perhaps you weren't the hero that you claim to be.

Let me put it like this: Chris Carroll and Shane Battier are the two best players in the conference by far (and there is no reason for me to continue writing reviews with my good friends on the internet). Among the 25 categories that the ACC keeps star for individual players, both appear in the top 20 in every single one of them, save the inexplicably awkward category of turnovers committed per game (which is actually led by the Deacons' own Josh Shoemaker -- who is doing them out of competition at a microscopic rate of 2.7 per game). But the total number of points that Battier and Deacons players receive in the rankings may not add up to the achievements of these two in any way we want to see what the other mystical

Women's tennis moving up in polls

The 49ers' women's tennis team moved up to fifth in the latest ITA poll, which was released Feb. 15.

The team has played well this season, with a record of 9-2 on the road. The ITA poll is based on a combination of wins and losses, and the team's improvement is due to strong performances in recent matches.

Duncan looks to keep streak intact

Former Deacon basketball star Tim Duncan may still have a chance to keep his streaked consecutive games played intact.

Duncan has played 185 games without missing a game since joining the NBA. However, the former Deacon guard is currently playing for the San Antonio Spurs and will miss his first road game of the season on Feb. 21.

Diamond Deacons seen as early picks

The Deacon tennis team is seen as an early pick to make the NCAA tournament. The team is currently ranked 15th in the ACC and has a record of 15-7 overall.

Tennis advances to semis of team nationals

The Deacon women's tennis team has advanced to the semifinals of the national team championships.

The team had a strong performance against the University of Memphis, winning 4-0 in the quarterfinals.

Sophomore Janet Bergman and the rest of the women's tennis team had an excellent weekend at the National Team Indoor Championships in Wisconsin.

Bergman, who played at the No. 3 singles position, showed everyone how good we are. All of our hard work has paid off," said Deacon coach Vanessa Simpson.

Bergman defeated Cintia Tortorella 7-5, 7-5, and Bielik paired up with Engel at the No. 1 doubles position, Bielik at No. 3, and junior Rafael O'Keley at No. 6.

The Deacons were very happy with their performance as a team, and they agreed that they gained a lot of confidence from the victory.

The Deacons will continue to work on their performance, but they are happy with their current level of play.

Women's basketball finals regaining wins momentum

The Deacons will continue to work on their performance, but they are happy with their current level of play. The team has a good chance to win the championship.
Detective John Smith: We have a lead on the crime, Officer. According to the witness, the perpetrator was wearing a distinctive red hoodie and carrying a duffle bag. This information may be crucial in our investigation. Officer Brown: Thank you, Detective. I will update our records with this information. Detective Smith: Also, we found afiber from the victim's clothing at the scene. It could be a match to someone in the area. Officer Brown: I will collect a sample from the fibers and submit them to the lab. Detective Smith: We should also interview all the witnesses to get their statements. Officer Brown: Agreed. I will start interviewing them right away. Detective Smith: Let's hope we can catch the culprit soon. Officer Brown: Ditto.
Ups and downs for Deacons indoors

Despite a lackluster team performance, several individuals scored well.

By Brian Barrett
Old Gold and Black Reporter

The men and women’s track and field teams had a mixed day at the ACC Indoor Track and Field Championships in Blacksburg, Virginia.

The teams placed sixth and seventh, respectively, out of a field of 12 teams in the indoor track finals on the campus of Virginia Tech.

Several standout performances were highlighted:

- In the 4x100 relay, Virginia Tech finished third, as well as in the 4x400 relay, showcasing the team’s strength in the middle-distance events.
- Janelle Kraus also performed well in the women’s 60-meter dash, finishing third.
- Sophomore Noel Ruebel set a personal best in the 800-meter run with a time of 1:58.30.
- Dave Deacon record in the 400-meter dash, with a time of 44.46 seconds.
- The Deacons capped off the weekend with a strong performance in the ACC Cross Country Championships, finishing third.

Continued from Page B1

minutes. But the Deacons couldn’t maintain the seventh lead and Duke jumped out to a 20-18 lead just under 10 minutes into the contest. The tandem of Battier and Carterwell led Duke during a 21-9 run, as the two veterans scored all but two of the 21 points in a five-minute span.

The Deacons would not fade, though, as they pushed to within five at 30-25 with a Josh Howard three-pointer just over 11 minutes remaining in the first half.

However, Duke continued to do well and took a 41-31 lead at halftime.

The start of the second half was really unusual,” Seth Lowry, Duke’s athletic director, said. “It was a disaster from the get-go. We didn’t do anything right. I’m very proud of how the team handled it. We had to keep fighting and we did that. We played well in the second half and we were able to put the game out of reach.”

Noel Ruebel said.

“Other standouts for the men included junior sprinter John Stone, who finished second in the 200-meter dash and third in the 60-meter dash. Junior Stephen Pro and John Ball each garnered fourth-place finishes in the 3,000-meter and the high jump, respectively. Both knocked offEvt of 6 feet. Another bright spot for the Deacons was the overall effort of sophomore Ryan Swanson, who set a Deacon record in the 800-meter run with a time of 44:46 seconds.

"While we had a great overall performance," Ruebel said. "I realize that we didn’t finish the highest in the standings, but we had athletes throughout the events, and if a couple of things go a little differently, we could have placed much higher."

Junior and senior sprinter and jumper Jaron Carterwell also performed well, scoring 15 points in the men’s 60-meter dash.

"That opportunity was the last straw," coach Seth Lowry said. "I thought they gave us the game away. I’m very proud of how the team handled it. We had to keep fighting and we did that. We played well in the second half and we were able to put the game out of reach.”

Noel Ruebel said.

“I think we’re a better basketball team than we were last month,” he said. "I think we’re a better basketball team than we were two and a half hours ago.”

While TIAA-CREF invests for the long term, it’s nice to see performance like this today.

TIAA-CREF delivers impressive results like these by combining two disciplined investment strategies.

In our equity accounts, for example, we combine active management with enhanced indexing. In these two strategies, we have two ways to work our investments more efficiently and help make your investing work twice as hard.

West African dance program waits

By Susannah Rosenblatt

The Mandinka Epic

March 28-29 in Pamplin Concert Hall.

The Mandinka Epic will be performed at the University of Richmond on March 28 and 29 in Pamplin Concert Hall.

The Mandinka Epic is a cultural and historical account of the rise and fall of the Mandinka people, a ancient African tribe that lived in what is now Senegal.

The performance will tell the story of the Mandinka people through dance, music, and storytelling.

The Mandinka Epic is a significant part of the cultural heritage of Africa, and it is an important part of the history of the University of Richmond.

The Mandinka Epic is a powerful story that will make a lasting impact on the audience.

Join us for this incredible performance and learn about the rich history and culture of the Mandinka people.

The Mandinka Epic will be performed on March 28 and 29 in Pamplin Concert Hall.

Get your tickets today and be a part of this incredible cultural event.

For more information, please visit our website at www.richmond.edu/mandinkaepic.
Youthful ‘Boiler Room’ heats up Wall Street

By Brent McConkey

I don’t generally go into the concept of a “gay movie” versus a “straight flick.”

Perhaps it’s because I’ve seen too many movies to know that labeling films to fit a specific genre is an exercise in futility (though by any standard, few of the straight ones come close). It’s also because I am currently under the impression of a biologically feminine film professor, whom I vaguely recall admitting that Thelma and Louise is the greatest film ever made. Or maybe it’s just because I really like Jerry Maguire.

In any event, I have to make this disclaimer in describing films. That said, Boiler Down is one of those films that could come to a gay movie.

The name of the film has gone out of print and is declarative. Michael (Ben Affleck) and Seth (Giovanni Ribisi) are married on stage in front of the audience. Want to know why? Because marriage is the only way to protect their marriage, or to be more specific, to protect their marriage from getting into overdrive.

For Michael and Seth, the film unfolds as Seth is forced to decide between a heavy conscience and a heavier wallet. This way of thinking comes from Seth’s tutelage in the Wall Street world by his mentor, a heavy investor/motivational speaker, who will do anything to make his money.

For Michael, the choice is easy. He becomes a go-getter and is involved in illegal activities to make his millions. This way of thinking is, of course, as being inspired by his hyper-competitive father, a federal judge who dispenses justice with a firm fist and a fierce lecture to make his son more worthy of his affection.

This attempt to lead even more to an already over-the-top Sherman brothers plot serves to much of the backstory.正能量, humanity is interesting, but greed is fun and much more to watch. The final scene sees something of a place, such as one in particular featuring a crying Seth called who we’ll learn are the mother figures.

The film also tries to use the same female-instigated conflict between Seth and the leader of the gang, which breaks up feeling unnecessary and understandable. Those scenes are great fun, however, so it’s not a surprise.

As you can see, the film is written and directed by a man, stars all male leads, and is a hot film that guys and girls alike could enjoy at least until the February film cliché dissipates.

Playing young, ambitious stockbrokers, Ben Affleck and Giovanni Ribisi bring their characters to life with skill. No one else would have had a chance at playing these roles with the same sort of enthusiasm as Ribisi and Affleck.

Anyone who says money is the root of all evil seems to have watched Boiler Room. The greed is perfectly written and directed, and the story is a perfect example of how greed can destroy a person.

The film is one of the few that truly captures the spirit of the dot-com bubble. The story is a cautionary tale of what can happen when people get too involved in the money game.

In short, Boiler Room is a film that will be remembered for a long time to come. It is a classic example of the type of film that will inspire generations to come.
Yo La Tengo may never register on the pop radar of mainstream America, but with And Then Nothing Turned Itself Inside-Out the band tops itself again and adds another amazing chapter to an already impressive history.

Beginning with Kaplan's whining guitar and Hubley's distant drumming on “Everyday,” the two immediately stake the grandest of all implied stages of love, declaring, “I want to cross my heart/I want to hope to die.” Later, on “Way To Fall,” Kaplan gets to dust off his distortion pedal and Hubley takes the tempo above 120 beats per minute, and you’ve got all the ingredients for a simply wonderful record.

Yo La Tengo may never register on the pop radar of mainstream America, but with And Then Nothing Turned Itself Inside-Out, the band tops itself again and adds another amazing chapter to an already impressive history.
