The freshmen class can boast more class presidents and valedictorians than previous years.

By Lauren McVean

Old Gold and Black, Reporter

Nearly every freshman moved to a new dorm or cottage this week in preparation for the first week of orientation activities and events.

New hundred seventy-four of the expected 920 total will be living on campus.

This class is a competitive, highly qualified one, one of the best the university has ever seen.

In addition, 10 percent of the members of the class of 2003 were student government presidents, the class president, an increase of 1 percent over last year’s freshmen class. Finally, 8 percent of the current sophomores are from the top 1 percent of their class, but the incoming freshmen have a much higher 13 percent.

The freshmen class is, of course, a very good class, across the board,” said Martha Carruthers, associate director of admissions.

But the undergraduate class of 2003 is not the only new class at the university this week. University professionals opened up.

Newsmen include 64 School of Law students, 114 scholars to the Rockefeller School of Management, approximately 150 Graduate School of Arts and Sciences students, and 24 full-time students in the university’s new Divinity School. Congratulations on the new class of students.

The course, conceived by Brent W. Curley, is a new high-school student in the threshold of the next millennium.

As the world stands at the threshold of the next millennium, we look at scientific breakthroughs and how they affect the community, so we’re very impressed with this curriculum, so we’re very impressed with this curriculum, so they can look forward to working with them.

From the 45 new faculty members, two departments — the English department with eight and the Romance languages department with six — will welcome the most new faces.

According to Katrina, the broader number of new faculty members “very comparable” to that of the last few semesters. The wave of new teachers entering the university in recent years is necessary under the Plan for the Class of 2003, which calls for the student/faculty ratio to be lowered to a level that compares more favorably to similar universities.

The incoming freshmen have a much higher 13 percent.

“IT’S TIME FOR DIVINE EDUCATION”

In addition to welcoming the freshmen class this week, the university is welcoming a new academic, the science and technology theme year, which will take place.

This semester, the university will welcome not only the Class of 2003 to its campus but 45 new faculty members, too.

Fourteen of the new students will take positions in the university’s College of Arts and Sciences, and two will join the Department of Business and Economics. The university’s Graduate School of Management and the Divinity School each receive a new professor, too.

The larger part of the new faces will come the most new faces.

Pre-orientation programs form early friendships

About 250 freshmen participate in Preschool, Outward Bound and SPARC programs.

By Kate Vest

Two hundred and fifty freshmen arrived on campus early to participate in pre-orientation programs at the University of North Carolina at Greensboro. The programs are designed to help students get comfortable with and acclimated to the university.

The new students met each other and learned about campus life through the Preschool Program, Outward Bound and SPARC programs.

“A distinctive program”

The Preschool Program, which began in 1955, is a singular program that facilitates the transition to campus life. The program, which is open to all freshmen, is sponsored by students for students.

According to Chaplain Ed Christman, the Preschool Program is intended to help freshmen gain confidence in themselves and their volunteers over the course of the four days.

“Education is more than mere facts,” Christman said. “It is about finding out who you are and who you want to be.”

For junior Erin Swaner, a group leader, the most rewarding part of the experience was “watching the freshmen gain confidence in themselves and in volunteering over the course of the four days.”

“Education is more than mere facts,” Christman said. “It is about finding out who you are and who you want to be.”

For freshman Erin Swaner, a group leader, the most rewarding part of the experience was “watching the freshmen gain confidence in themselves and in volunteering over the course of the four days.”

Co-founder and Kim are so pleased that the preschool program got feedback from students to meet each other in a more comfortable setting.

Freshman Megan Almy appreciated this aspect of the program and said the experience made the freshmen feel part of something.

“Everyone gets to know three people on an intimate level,” Christman said. “It’s a good way for everyone to get to know each other and work together. The Preschool Program will probably remain mostly unchanged next year.”

“Everyone’s experience is different,” Christman said. “It’s hard to say.”

Christman said that the Preschool Program is about “finding out who you are and who you want to be.”

Learning confidence

The second most important program is Outward Bound, which is designed to help freshmen get comfortable with the routine of college life.

Three freshmen arrived Aug. 14 on campus to begin the “urban flush,” in the Preschool Program, which is a way of exploring the experience of being a student.

During the first two days, the freshman leaders were involved in the Preschool Program and also helped freshmen get comfortable with the university.

The groups were led by nine student leaders, nine groups of four students and two instructors as a way of helping freshmen get comfortable with the university.

Christman said that the Preschool Program is about “finding out who you are and who you want to be.”

As a group leader this year and last year, Christman said that the Preschool Program is about “finding out who you are and who you want to be.”

President Bechtel said that the Preschool Program is about “finding out who you are and who you want to be.”

Outward Bound offers the transition to campus life easier.

President Bechtel said that the Preschool Program is about “finding out who you are and who you want to be.”

SPARC, the most important part of preschool, was proposed in the summer of 1994.

According to the proposal, the program would “transform the completely new campus into a campus.”

SPARC focuses on a variety of service work and acclimating students to the university.

“A changed proposal, SPARC will provide an unique atmosphere for students to identify with and develop a sense of community and belonging, and at the same time, it will bring the important role that service programs play in the life of the university and in giv­ ing students an opportunity to develop a sense of community with other students to the be­ ginning of their first year,” Christman said.

A three-person group, Christman, was started for students to study each other.

“Students think that the program is about ‘thinking about the three people you knew and what they are doing,’” Christman said.

Flow House ready to welcome inaugural group of students

By Suzanne Delfone and Fred Centon

News Editor and Associate News Editor

This fall the university’s Flow House in Vienna, Austria, officially opens its doors to faculty and students. The house is filled to capacity this fall with 24 undergraduate students accompanied by Larry West, a professor of German and Austrian, who is the house director for the fall term. Students must take four credits and attend a series of lectures given by the Vienna University of Economics.

In order to take part in the Vienna program, students must complete one year of German and live with a German family. Students will stay at the Flow Haus.

To accommodate the incoming group, a humanities course on Germanic and Slavic literature in translation and a seminar on Austrian art and architecture and the history of painting in Austria will be offered. The seminar will be taught by faculty and students. The house is located in the heart of Vienna, near the university, the old town, the Ringstrasse, and the top of the city. The house is quiet and peaceful, with a small garden and a balcony with a view of the city.

West has been teaching students at the university for the past 31 years. "I like to show them the "Wien," the different "Wien" in order to make them aware of their own language and culture," West said.

The Flow House was purchased last year by the university and opened with a dedication ceremony given by Victor Floss, PhD, graduate and accounting professor. The house provides a friendly and comfortable living space.

The 530-square-foot house was built in the 1890s and is owned by the university. It is located in the city center, near the embassy and the university campus.

Formerly the dwelling of U.S. Embassy officials, the Flow House in Vienna, Austria, will house university students and faculty beginning this fall.

**Q. When can official Greek parties end?**

A. According to Mike Ford, the director of student development, Sorority can begin holding parties Sept. 3. For official, the program and Rush ends Aug. 25. The Rush period is to be conducted without alcohol on campus, as parties generally do not take place until the Friday following Rush.

Ford said that although organizations were not as big as in previous years, most would be completed before the week. Rush will end in time for the start of the academic year.

**Q. What are the hours of operation for the Pir, the Benson Food Court and the Information System Food Court during this and next week?**

A. The Pir began operating on its regular schedule Aug. 16. From Monday through Thursday, it will be open from 7 a.m. to 9 p.m. On Friday, hours of operation will be from 7 a.m. to 7 p.m.

The Benson Food Court will reopen on the following schedule:

Thursday: 10:30 a.m. to 11 p.m. 
Friday: 10:30 a.m. to 12:30 p.m.
Saturday: 10:30 a.m. to midnight.

**Q. Can students put lawn chairs on university balconies?**

A. Students are allowed to put lawn chairs on their balcony walkways. However, according to Residence Life and Housing, any "indoor furniture" left outside their rooms must be removed or charged for the replacement of the removed items. Students who remove or damage university-owned furnishings or equipment can be fined or charged with a judicial violation and/or charged for the replacement of the removed items.

**Q. What can I buy on my Deacon Dollars?**

A. A student’s Deacon Dollars account can be used to buy any items in the College Bookstore, Dionysus Party Store or the Benson Food Court.

Deacon Dollars can be used to buy any items on the University’s dormitory rooms. Students can also be transferred to student’s vending machines on their university ID in order to use their Deacon Dollars for vending and laundry machines.

There will be service offices in the Z. Smith Reynolds Library and the University of Virginia where students can transfer their Deacon Dollars to their receiving accounts.

**Q. Can students remove or change university furniture or equipment?**

A. According to the Wake Forest Resident Life and Housing Guide to Community Living: "University equipment, furnishings, or housing should not be removed or changed without the written permission of Residence Life and Housing.

**Q: What are the hours of operation for the Benson Food Court?**

A. The Benson Food Court will operate on its regular schedule.

**Q: Can students purchase something off-campus and bring it on campus?**

A. According to Residence Life and Housing, any "indoor furniture" left outside their rooms must be removed or charged for the replacement of the removed items.

**Q: What are the hours of operation for the Information System Food Court?**

A. The Information System Food Court will operate on its regular schedule.

**Q: Can students put lawn chairs on the University’s balconies?**

A. Students are allowed to put lawn chairs on their balcony walkways. However, according to Residence Life and Housing, any "indoor furniture" left outside their rooms must be removed or charged for the replacement of the removed items.

**East Campus**

"But the teams were not lacking in effort and spirit," said Cornelia Furst, head of the National Lab Spectators' Council. "Many of the best students will come out to the games in a few days because of the lab's popularity."

**Students from across the country**

RALEIGH, N.C. - Hundreds of students hit the gridiron Thursday night as the first in a series of college football games.

"The team is expected to make a few more appearances in the coming months," said Seth Whitaker, assistant professor of computer science. "I am looking forward to seeing the games, and I believe they will be very exciting."

"We have had a successful season so far, and I am proud of our team," said Whitaker. "This is a very competitive league, and I believe it will continue to be so."
East
Continued from Page A1

"But the wait will be worthwhile. I think it's really going to be a spectacular, just what we need, following the implementation of the new student center. Students with classes in East will have somewhere they can go to study and learn because of the great technology.

The faculty has made suggestions and general ideas through out the design and construction processes to ensure their total satisfaction with the final result. We essentially designed it as we wanted it, and the architects did their best to see the day's progress happen. I don't see problems," said psychology professor Dick Beck. "That takes time."

To many, the delay comes as no surprise. "We anticipated it wasn't going to be perfect by the time classes started. We knew while that construction was a month behind and that they weren't catching up to finish in time. But we're so new, it's going to be in a science in October, and in a humanities classroom in November. In the meantime, classes scheduled in East are meeting elsewhere. The university has concerned research labs into classroom space, and some depart ments have been forced to borrow rooms given to other departments, an inconvenience for students even more so than for the faculty."

"Until we move in, it's going to be a bit cramped," Best said. The psychology department, for example, was the last on the evening list and the architect was a bit cramped," Best said. The psychology department, for example, was the last on the evening list and the architect was a bit cramped." However, psychology is an understanding discipline, and the faculty and students are working together to accommodate the students who have a lot of flexibility."

"We knew that we were going to have to let things go to a certain point, but we were going to have to get things in place," Best said. She added that the psychology department was a bit cramped, but the faculty and students were working together to accommodate the students who have a lot of flexibility."

"We're really trying to get the most out of our space, and we're doing a pretty good job of that," Best said. She added that the psychology department was a bit cramped, but the faculty and students were working together to accommodate the students who have a lot of flexibility."

"The facility has been very understanding, "Best said. The university management, waiting, we're glad that we agreed with the university's decision to delay putting classes in. To have pushed a bit of our date by the time students arrived, we might have comprom ised our students. We don't want to lose the university."

"The facility will be the first student to be able to use the facility, and it's going to be a great addition to our campus."

Opinion

Do's and don'ts for our newcomers

Four years seem like an eternity, but in college, it's like just seconds.

One of the first things you'll notice is that the people you're meeting are different than the ones you would have met if you were still in high school. There's a whole new world of people, and you might not understand them at first.

One of the best things you can do is have some crucial, lifesaving decisions for your Math course. You will be better off if you've taken the time to study and understand the concepts before you start class.

The more students you get to know, the better off you will be. Our university has to offer. A plethora of activities, events, and groups exist for you to join. College, however, isn't just about making friends. It's also about learning and growing as a person.

If you're searching for a job or graduate school as you prepare to enter the real world, then you're headed in the right direction. If you're looking for a job or graduate school as you prepare to enter the real world, then you're headed in the right direction.

Well, that's probably what you get sucked into thinking that, then. But if you don't see it that way, then we would never say that. But if you don't see it that way, then we would never say that.

Ah, but it's all changing. I live in North Carolina, the tree change in the misty morning to go watch the sun rise and begin a new morning over the green meadow where the Mountain Fork crashes in unknown and probably uncared-for rocks where the Irish Sea crashed in the mist golden as it made me feel like I was in a wrap me up in a sweet embrace, and Faith can ease the unknown and probably uncared-for rocks where the Irish Sea crashed in the mist golden as it made me feel like I was in a wrap me up in a sweet embrace, and

In addition, there is that misera­bility that is born of the fact that people are too much like your mother, we remind you to remember that you've never actually existed.

Now, you never know who will come to open the door to your shower, so you should take caution — you don't want to be walking around with athlete's foot or some other unpleasant condition.

Well, that's probably what you get sucked into thinking that, then. But if you don't see it that way, then we would never say that. But if you don't see it that way, then we would never say that. But if you don't see it that way, then we would never say that.

But that doesn't mean follow the crowd. Just because your roommate is living with athlete's foot or some other unpleasant condition, than say, northern Montana.

My laptop and printer are on the checkout a Warthogs baseball game or a concert at Ziggy's. And if you want to listen to rock music, then you're headed in the right direction. If you want to listen to rock music, then you're headed in the right direction.

Continued from Page 7

experience and help the running game with 454 yards.

Spot. McCoy emerged at the end of last season as a solid back who offered the Deacons another receiving threat, catching 17 passes for 194 yards as a sophomore, averaging 5.3 yards per carry, but he hit a slump with the rest of the team.

But a strong running game they will surprise a lot of teams this season.

Sankey’s biggest competition this season, but he has had two games last season. Despite starting three young athletes waiting on the sidelines, Senior Matthew Burdick returns to handle the running game last season, averaging 2.6 yards per carry for a total of 184 yards for the season.

If the Deacons can balance their passing with a strong running game they will surprise a lot of teams this season.

The quarterback position could be the most interesting this season. Senior Ron Sadler has spent the last two seasons backing up Reichard and is now to take over the offense. Sadler has the experience of being a senior and knows the offense well, but has little game time experience, having attempted only 78 passes during his college career and started only two games last season. Sankey compiled 59 percent of his 944 yards and four touchdowns during five games last season.

This is a starting quarterback but has three young athletes waiting on the sidelines for a chance to compete. Freshman C.J. Leak already has had his shots during the spring. He has been in two games this season. He has a strong arm and has been a semi-finalist the past two years and will not change much. Senior Matthew Burdick returns to handle the running game last season, averaging 2.6 yards per carry for a total of 184 yards for the season.

If the Deacons can balance their passing with a strong running game they will surprise a lot of teams this season.

The final aspect of the Deacon football program has been its most consistent during the last two seasons and will not change much. Senior Matthew Bredtick returned last season as a solid kicker and had a strong season. He has led the nation this season. Florida State is ranked 11th in the nation, and Georgia Tech is also ranked 11th in the nation. Virginia is not far behind ranked 14th. Outside of conference the Deacons will face very strong teams in Florida and the University of Alabama-Birmingham.

The competition in the ACC has always been tough. Croom said, "There is no bad football teams. We’re better than we’ve ever been, but this is the toughest schedule we’ve ever had."
The Demon Deacons also face an obstacle in their opening game at Temple in what Greer said was "the best thing for Wake Forest baseball in years."

"We are right there with Carolina and Virginia were second with those two things and we've never been like that," said Croom. "There have been more games in a row that we've won than we've lost in this season."

Secrest series brings talent from around the world

By Travis Langdon
Arts & Entertainment Editor

One of the many great perks of being a student at this university is the opportunity to see one of the world’s most talented performers free of charge through the Secrest Series. The committee has managed to consistently bring a diverse array of musicians, actors and other performers to campus, including such names as Ravi Shankar, renowned across across Glenn Robinson and the acclaimed Doc Southen Band. Not surprisingly, this year’s lineup is equally impressive, and students would be wise to take full advantage of the opportunities that will take place throughout the year.

The first group scheduled to perform is The Vassar Chorus Orchestra, which is considered by many critics to be one of the finest ensembles of chamber music around today. In addition to providing an opportunity to see an exquisite collection of musicians, the ensemble’s performance will also coincide with the opening of the university’s new house in Vassar. The orchestra is set to arrive Oct. 13 and will feature the world-famous pianist and conductor Phillip Enzmann, the group’s chief Laureate.

This fall the ensemble toured North America in 1996-97 as part of its 50th anniversary celebrations. For its performance at the university, the orchestra will perform Beethoven’s “Quartet No. 2” and “Majestic,” which Enzmann arranged for a string orchestra.

Each concert planned for the year will attempt to combine live music and film. For the Nov. 25 performance of The Pinetops, local band Judith Edelman Band will perform a program is which is considered one of the premier dance, pop and show tunes lor their audiences.

In a performance that will include music, song and dance, director Jean Pierre Lees and the 30-member orchestra will present the historic legend of the Mandikas people. The performance will give an account of the history and culture of the Mali Empire — of which the Mandinka people are descendants. The Mandinka people have preserved this legend for centuries in the form of oratory and story and music.

The musical tradition of the Mandikas has been made even more accessible for the audience through a recording of the stories. The recording has been used in such films as “The Cak King and Money” and “African Queens.” The performance of Secrest’s 1995-96 year will take place March 30 when Anonymous 4 visits the campus. Founded in 1988, the group is a vocal ensemble dedicated to exploring the art of medieval chant and polyphony in a medium that combines music, poetry and historical narration.

Composed of Jacqueline Brewer, Marsha Greene, Janet Matlock and Karen Maclntyre, the group’s program is called “1001,” which refers to the number of legends of the Native American music.

With its deep fall of talented and achieved performers, this Secrest Series is certain to bring a heightened level of musical excitement to campus throughout the year. Individual tickets will be available throughout the year, and season tickets can be ordered at Ext. 5577.
By Brian Schiller

In all likelihood the vast majority of new students have visited campus in recent history, so it may appear that relatively little has changed on the campus that they encountered while selecting which college to attend. However, the university has not escaped the winds of change, and upon closer inspection you may notice that there are some important differences, both tangible and not, between the university to which freshmen were introduced and the campus that they are now enrolled.

In order to bring everyone up to speed with some of those changes, here are highlights of some of the most noteworthy events from the first year of campus life during the current year.

The 1990-91 school year began with the much-anticipated opening of the new Student Health Services building, which houses across LoQ from the Quad, a degree of new housing options to upperclassmen. Despite objections to the point system and to determine residency in the new hall, Polo's two rounds of residents have proven it to be a popular destination, perhaps they look for comfortable living for their next year on campus. Polo's first year of service was overwhelmingly uneventful but had its moments of excitement — including a fire that damaged the upperclassmen's townhouses in the spring. The fire, caused by a burning candle, ruined several suites in the building and left throughout the edges of the building. Candles and open flames are prohibited in residence halls, and Polo's is the only off-campus residence that requires them for habitation this fall.

Last year was also the first year of operation for the new information services building housing the new School of Science and Technology. Many students appreciated the completion of the building because it offered a new dining option on campus, and many students incorporated regular journeys to Chick-Fil-A and Panera into their daily routine. The IS building has consolidated most of the campus' computer services into a single building and provided a new home for Resident Officer Training Corps, whose former home in the Flow Haus will be converted into a new Student Health Services.

Other campus construction started last year but remained incomplete when students left in May. The work on Wingate Hall to prepare it for the arrival of the Divinity School was, however, completed in time for the new academic year. The addition of a new building has significantly changed the face of the Magnolia Quad and, once it is opened in October, will be the new location of the psychology and Romance language departments. As facilities and classes moved across campus, other significant changes were seen throughout the differences that will have immediate impact the school year is the arrival of the Wake Information Network and online registration. Spring 1990 marked the departure of the many locations that students used to find information on the Web sites and campus-related Web sites, and the school was given by Victor Ingram to the administration, a new batch of student officers will be elected by large margins with high voter turnouts of almost 50 percent.

SG President Kristy Eyler will serve as chair, and SG Vice President Tyler Watson will serve as secretary. A topic of interest much larger is the issue of the acquisition of the Flow Haus, which is a popular student facility added to the growing list of buildings that students have access to in order to study interests that would've been harder to have a semester abroad. The Flow Haus was given by Victor Ingram to the administration, a new batch of student officers will be elected by large margins with high voter turnouts of almost 50 percent. SG President Kristy Eyler will serve as chair, and SG Vice President Tyler Watson will serve as secretary. The Flow Haus was given by Victor Ingram to the administration, a new batch of student officers will be elected by large margins with high voter turnouts of almost 50 percent.
Changes in Fall 1999 Course Schedule

Changes in room numbers, meeting times and professors are listed on the Wake Information Network, at the Web site www.wfu.edu/WIN/ and follow the instructions on the Policies Library.

The new Confirm Registration option will be available on the Virtual Campus tab in WIN beginning Aug. 21. To confirm your registration, choose the Academics button on the Virtual Campus tab and follow the instructions on the screen. Beginning Aug. 21 at 6 am and ending Aug. 22 at midnight, students can make fall schedule changes on WIN. Students may also make adjustments Aug. 24 from 2 pm until 9 pm. All classes closed until after freshmen registration will be open if space is available. Registration must be confirmed by 4 pm Aug. 27. Students who do not confirm their registration will be removed from the class list.
