Confusion arises

Communications breed problems

by Amy Meharg

Creation of a new office would make for a less stressful management and create major power changes, Shiveley said. The student administration office, for instance, would have the authority to decide what to do with the space left as a result of the pool Dee's decision, she added.

In her November 5 presentation, she said the Deans of the College had decided to move Dee from its current location in the Administration Building to another area in the center of campus.

"We don't know to which building," she said. "The Student Advisory Board was left to decide the area."

In the meantime, she said she was looking forward to the new office for the student administration office, which will be located in the Administration Building.

"We are very excited about the new office," she said. "In addition to being a very nice space, it will provide a very nice environment for our students and our faculty."

President Scales supports present tenure system

by Marjorie Miller

President James Ralph Scales supports the tenure system in place at Wake Forest University. He says it is important for the university to have a system that is consistent with its academic standards.

"I support the tenure system because it is important for us to have a system that is consistent with our academic standards," Scales said. "This system is important for the university to maintain its academic integrity and to attract the best possible faculty."

Tenure is a system that allows professors to remain on the faculty for their entire careers. It also provides a mechanism for faculty to pursue research and other scholarly activities.

"The tenure system is important for the university to maintain its academic integrity," Scales said. "It is also important for the university to attract the best possible faculty."
Fire breather burned

by Glorige Dubois

Freshman performer Jeff Jeffries received first and second place honors during the final round of the college’s haunted house contest. Jeffries, who faced his fear during the fire breathing act.

The name of his brave and modest attempt to climb the line on the course.

Scales added that a large education was the only qualified data about Triad area businesses' needs for such a service and about the results of the study.

Jeffries does not plan to go forward, and last summer successfully completed his training. The study also tried to determine the benefit area businesses would definitely benefit from such a service. The center would include an international bonded warehouse to serve as a display facility and market place for the merchandise. The study included evaluation of similar services already in operation. The center would be a beneficial service to companies. He pointed out the Dallas study to others.

Jeffries neatly composed the means of mentioning the benefits. He described it as a "beneficial service to companies in-"ever, and again," Jeffries said. With Selective Service, the center's management must be worked out. The study suggests that a private freight broker manage the lot. Felton is looking forward to reevaluating a case, and Jeffries is looking forward to others. The center was born in Greensboro, N.C., where she began the first. The idea of the concept, and the center's management must be worked out. The study suggests that a private freight broker manage the lot. Felton is looking forward to reevaluating a case, and Jeffries is looking forward to others. The center was born in Greensboro, N.C., where she began the first. Study determines feasibility of recommended trade center

by Doug Vukelich

Last summer, a group of students and faculty members from the Babcock Graduate School of Management conducted a six-week feasibility study of the Triad area for a proposed trade center on the old Greensboro airport property. The study also tried to determine the benefit area businesses would definitely benefit from such a service. The center would include an international bonded warehouse to serve as a display facility and market place for the merchandise. The study included evaluation of similar services already in operation. The center would be a beneficial service to companies. He pointed out the Dallas study to others.

Quality students receive Reynolds scholarships

By Ray F. Smolak

Four outstanding freshmen are the recipients of the first Reynolds Scholarships. The scholarship permits students who have earned a 3.5 or better grade point average a $500 award and a $2,000 allowance towards the cost of tuition and fees for the following year. The recipients are Josephine M. Boles, Richard A. Johnson, William T. Reynolds, and Jane C. Smith.

Josephine M. Boles, a student in the College of Arts and Sciences, has a major in French and a minor in English. She is a member of the French Honor Society and the Women's Club. Richard A. Johnson, a student in the College of Business Administration, has a major in accounting and a minor in economics. He is a member of the Beta Alpha Psi accounting fraternity and the Student Government Association. William T. Reynolds, a student in the College of Arts and Sciences, has a major in history and a minor in economics. He is a member of the History Honor Society and the Alpha Chi Omega fraternity. Jane C. Smith, a student in the College of Arts and Sciences, has a major in English and a minor in French. She is a member of the English Honor Society and the Alpha Xi Delta sorority.

Each recipient will be required to complete 30 credit hours and maintain a 3.5 grade point average during the fall semester. The scholarship will be renewed for the second year if the recipient maintains the required grade point average and completes 24 credit hours.

This scholarship was established by J. Reynolds, a 1952 alumus of Wake Forest University, in memory of his wife, Mrs. J. Reynolds. The scholarship is managed by the Office of Student Aid and will be awarded to students who meet the eligibility requirements.
Geographical differences subtle

Geography is a term whose meaning has evolved. It has been described as the study of the earth's surface, the distribution of features on the earth, and the relationships between human beings and their environment. But what is geography, really? Is it simply the study of the earth's surface, or is it something more? Geography is a complex and multifaceted discipline that encompasses a wide range of topics, from the physical characteristics of the earth to the cultural and social aspects of human societies. In this essay, I will explore some of the key concepts and ideas in geography and consider how they relate to our understanding of the world around us.

First, let's consider the physical geography of the earth. This includes the study of the earth's surface, including its landforms, water bodies, and climate. Physical geography also encompasses the study of the interactions between the earth's surface and the atmosphere, such as the formation of weather patterns and the movement of air masses. These physical processes play a crucial role in shaping the landscape of the earth and influencing human activities.

Second, we must consider the human geography of the world. This includes the study of human societies and their interactions with the environment. Human geography examines how people create and manipulate their environment, how they use resources, and how they adapt to changes in the environment. This includes the study of urbanization, rural development, and the impacts of globalization on local communities.

In conclusion, geography is a complex and multidisciplinary field that encompasses both physical and human aspects of the world. It is a discipline that is essential for understanding the world around us and for making informed decisions about how we interact with and manage our environment. By exploring the key concepts and ideas in geography, we can gain a deeper understanding of the world we live in and the role we play in shaping it.
The prospects for the language program at Wake Forest are indeed bleak for the 1984-85 academic year. The possibility of opening a branch of the French Institute and Spanish Institute on campus is minimal. This is due mainly to the realization that Wake Forest is not only short of funds but also has a far more difficult financial situation than these other universities. In fact, the language program is in serious trouble at Wake Forest.

The language houses, as they are currently operated, provide an essential curricular program that allows students to immerse themselves in the different cultures and languages that are available in the foreign language programs. The language programs at Wake Forest are extremely important for the university and its students.

French and Spanish houses provide the only opportunity for students to practice their language skills in an informal and authentic setting. They also provide a break from the rigors of academic life and allow students to relax and enjoy themselves. The language houses are an integral part of the Wake Forest experience and are highly valued by students.

However, the recent financial difficulties at Wake Forest have led to cuts in the language program. The French and Spanish houses have been affected by these cuts, and the future of the language program is uncertain.

In conclusion, the language program at Wake Forest is facing a difficult time. The University must take steps to ensure the continued existence of the language program and the language houses.

Graylyn restoration continues

Graylyn is the home of the French and Spanish language programs at Wake Forest University. The house is situated on the campus of the university and is open to students who are interested in learning a foreign language.

Graylyn is a beautiful and historic building that has been a part of the Wake Forest community for many years. The house is named after the Gray family, who were the first settlers in the area.

The French and Spanish language programs are housed in Graylyn and provide a unique opportunity for students to learn a foreign language in an informal and authentic setting. The programs are open to all students, regardless of their level of proficiency.

Many students have found Graylyn to be a valuable resource for their language studies. The house is located on the campus of the university and is easily accessible.

Graylyn is also a great place to socialize with other students who are learning a foreign language. The house is open to all students, regardless of their language of study.

If you are interested in learning a foreign language, Graylyn is the perfect place to begin. The French and Spanish language programs are open to all students, and Graylyn is a beautiful and historic building that is sure to provide a great learning experience.
Milner also teaches at Governor's School
by Trish Miller
Chairman of the department faculty, is a founding dean of the Governor's School. He also teaches as the director of the Governor's School.

"The school's curriculum is a liberal arts curriculum, traditionalists do not view education as a liberal arts field, but Milner is proud that his students are learning to become teachers. But our majors are prized by traditionalists as well as a passing score on the National Teacher's Exam, the certificate is accepted in 40 other states as well, Baren said, "It's a good liberal arts education."

"We encouraged students to take the Governor's School as a junior in their last year of high school, it encourages students to continue their education in a university, and it provides a good education in the arts."

"The health, science, social studies and English are based on subjects that are more challenging than other subjects," he said. "Whether you're working with children or teaching in a vacuum, you have to be very conscious of what you're teaching, and the Governor's School provides a good education in the arts."

"As a weekly feature in the Old Gold & Black, the department's philosophy, the role of the department at a liberal arts college, and the philosophy of the Governor's School is something that has now become the core of the Governor's School."
Defense sputters

Offense sparkles in defeat

by Jim Snyder

Wake Forest (7-1) was too often and disappointingly as usual, blanked out by Maryland's (5-1) defense and allowed a 21-14 loss Saturday in College Park.

John Nath of Maryland scored more than his own total of yards for the season, running for 202 yards and two touchdowns in Wake Forest's first big midfield junior, all second down touchdowns, and two more as the Wake Forest's offense was a near year to skip for Wake Forest.

Wake Forest also had several redeeming performances, especially from quarterback Gary Schofield and running back Michael Ramseur, Schofield completed 10 of 21 passes for an ACC record for an attempted interception. Schofield's national record for completions and attempted passes by four each.

Ramseur did his work on the ground, against a Maryland defense that previously allowed an average of only 4.4 yards per game. Ramseur rushed for 152 yards against a second quarter punt game, with the Terrapin's one yard carry for Maryland's 20th yard.

With the wild toothed ball, Wake Forest immediately committed by driving the ball into two plays covering 56 yards as they forced Maryland to punt.

The only running play was Wake Forest's record of 152 yards by Ramseur.

The first touchdown of the game came just 16 seconds into the second quarter. Maryland scored a field goal, but the Deacons were able to hold the ball with Maryland's one yard carry for the touchdown on the 25.

The Terrapins were not able to recover on the 25.

With the ball still in play, Wake Forest immediately committed by driving the ball into two more plays covering 56 yards as they forced Maryland to punt.

The only running play was Wake Forest's record of 152 yards by Ramseur.

The first touchdown of the game came just 16 seconds into the second quarter. Maryland scored a field goal, but the Deacons were able to hold the ball with Maryland's one yard carry for the touchdown on the 25.

Netters play for variety of reasons

by Kimberly Hall

The 16 members of the women's tennis team play the game for a variety of reasons, ranging from scholarship to personal

Heather Propst, a senior from Florence, was a doubles player for the team. "I like to play tennis because it is an outlet for me to relieve stress," she said. "It is a sport you have to learn to enjoy," Katie Foote, a junior from Winston-Salem, said. "I like competing and since I've been playing tennis in school, I've enjoyed it very much." For the two seniors, Leslie Caplan and Leslie Johnson, tennis has made a big difference. Caplan decided to come to Wake Forest because of the tennis scholarship. "Since I've been around someone playing tennis for six or seven years, I've been playing tennis for seven years," she said. Caplan said that she likes tennis because it is a small group, yet it's independent. She also feels like it's a small game you can play a lot more. Johnson has played tennis since she was 14. "I think my family is the reason I love tennis," she said. "My mom used to play and she still does." Johnson said that she enjoys competing and being part of a team and has been active in tennis for eight years, on and off. Johnson also feels like it's a sport you have to learn to enjoy. 

Kissy Hite is a senior from Denmark who originally wanted to come to Wake Forest to study English. After coming to Wake Forest, she decided to stay and finish her degree. Hite is a physical education major with a minor in Gerontology. Hite has played tennis for 12 years. "I think tennis has been a good outlet for me because you can have your own friends and have a part of a group, yet it's not cliquey," she said. Hite has competed and since she's been in school, she's been having a lot more fun. For the two seniors, Leslie Caplan and Leslie Johnson, tennis has made a big difference. Caplan decided to come to Wake Forest because of the tennis scholarship. "Since I've been around someone playing tennis in school, I've enjoyed it very much," she said. Caplan said that she likes tennis because it is a small group, yet it's independent. She also feels like it's a small game you can play a lot more. Johnson has played tennis since she was 14. Field hockey

The women's field hockey team dropped a 4-0 decision to Virginia Tuesday night. The Deacs outhit the Terps 12 to 9 but were unable to score out of 21 girls are from the north. The sentence should have read all but 4 error.

The Old Gold and Black bell the

Deacs lost the Terps 12 to 9 but were unable to score in the overtime. The victory was granted after the Deacon's loss in the overtime.

The men's soccer team lost to Lenoir-Rhyne, 4-0, and fell to Virginia Tech 2-0 in the North Carolina State.

Correction

In last week's story, "Broderick's about them," it was incorrectly reported that only 10 of 22 hockey players were from the north. The sentence should have read, "all but 4 of 22 hockey players were from the north." The full story and Mark Agnitis for the error.

Sports in brief

The men's soccer team lost to UNC-G 3-0 on Thursday. Levi Jonkheer, Louis Trechsel and Mike Sonier scored the goals for the Deacs.

Earlier in the week, the Wake Forest Demon Deacons fell to the Terps 15-9, by 3-0. The Deacs outscored the Terps 12 to 9 but were unable to capitalize on any of their opportunities.

The Deacons play South Carolina this Sunday and Duke on Wednesday. The league's overall record is 6-5-2, 3.0-0.

Intramural results:
