Escott addresses grade inflation concerns at open forum

BY DANIELLE DEATON

Escott has railed against one-time issues of grade inflation, but he has praised them when they have been well-deserved and consistent. In an open forum Wednesday night, Escott addressed grade inflation concerns at Wake Forest, and Deborah Hearn spoke to Greek groups about alcohol abuse.

Hearn told the students about his experience of growing up with an alcoholic father, describing the impact of the family's challenges on the individual. Hearn emphasized the importance of recognizing the abuse and taking steps to prevent it.

Hearn also discussed the growing number of fraternity pledges. She said that every fraternity at the university hazes, he said he had spoken to every fraternity about this issue. She said that every fraternity had dangerous requirements and that every fraternity should be review in A&E.

Hearn spoke to Greek groups about alcohol abuse, hazing

Grant to provide funds for study on computers

BY RICK ROBERT

President Thomas K. Hearn Jr. expressed Monday night his personal and professional concerns regarding alcohol abuse to nearly 50 Greek students at an open forum sponsored by the Physical Planning and Interoffice Committee.

Hearn said that he was speaking on behalf of the administration and not the faculty. Hearn assured the students of his support of Greek organizations and said that the first group, led by Ananda Mitra, is if computers will supplement their group, according to Hazen, is if they will be lost in the technology.

The second group, headed by speech communication professor Alan Louden, will focus on the communication between students and faculty. The group will study the effectiveness of the Plan for the Class of 2000.

He also used the letter to remind faculty that the first group, led by Ananda Mitra, will investigate if computers will supplement their group, according to Hazen, is if they will be lost in the technology.

SG deliberations broadcast on WAKE TV

BRIEFLY

\* Honor, judicial results reported

The Judicial Board held their hearings, two on Oct. 12 and one on Oct. 11. For more details on these cases and the outcome of both, see page 4. For a summary protection and a list of all the cases, see the Judicial Board's website.

\* Run with the Deacs to be held

The sixth annual Run with the Deacs will be held on Sat., Nov. 3, on the cross-country course. This year's theme is "Run with the Deacs to be Held on Nov. 3," and the event is sponsored by the men's and women's track teams. There will be a 5K race and a fun run for those who want to walk. Check out the course from Pacifica High School on Saturday, Oct. 17.

\* Psychology holds colloquium

The department of psychology will hold a colloquium on Oct. 15, from 1 to 2 p.m. in W. S. Watkins. The colloquium, sponsored by the faculty, will feature speakers from the department of psychology.

\* Film symptom being offered

"Politics on the Fringe: Images of American Popu­

lar Culture in the 1960s" is a new course being offered in the department of film and media studies. The course will focus on the cultural and political issues of the 1960s, including the Vietnam War, the civil rights movement, and the Vietnam War. The course will be taught by Professor John Wilson, and will meet on Tuesdays and Thursdays from 12 to 1:15 p.m. in W. S. Watkins. For more information, call 555-5555.

\* Foreign travel programs provide study alternatives

Since the establishment of the Office of International Studies in 1984, study abroad opportunities have increased at the university. The office now offers a variety of study abroad programs, including programs in Europe, Asia, and Latin America. For more information on the foreign travel programs, contact the Office of International Studies.

\* Business honor society to induce new members

The Student Government Association will be inducting new members into the business honor society. More than 50 students are expected to be inducted, and the event will be held on Oct. 17, at 7 p.m. in W. S. Watkins. The inductions will be held in the presence of faculty and staff, and will include the presentation of recognition certificates to the new members.

Recent upgrades to the connection between Bowman Gray and the National Science Foundation (NSF) will allow for a faster and more reliable transmission of data. The upgrades have been in place for several months, and the connection now has a capacity of 1.5 million bits per second. The upgrades were made to increase the speed of transmissions, and the university is now planning to upgrade its connection to NSF to 45 million bits per second. The upgrades will allow for a faster and more reliable connection to NSF, and will provide access to NSF resources.

Foreign travel programs provide study alternatives

Applications are now available for the foreign travel programs. The foreign travel programs will be held on Oct. 17, at 7 p.m. in W. S. Watkins. More than 50 students are expected to be inducted, and the event will be held in the presence of faculty and staff, and will include the presentation of recognition certificates to the new members.

Since the establishment of the Office of International Studies in 1984, study abroad opportunities have increased at the university. The office now offers a variety of study abroad programs, including programs in Europe, Asia, and Latin America. For more information on the foreign travel programs, contact the Office of International Studies.

\* Weather Information Available

For news about campus events in the fall, students are encouraged to check the campus newspaper, The Deac. The newspaper is published weekly, and provides news about events, campus news, and campus climate. The newspaper is available at the student center and online at the university's website.

Students attend Million Man March

Dr. Frank E. Sowell

When freshman Steve Leach talks about his experiences at the Million Man March, his spirit quickens and his eyes brighten.

"It felt like you knew everybody," he said with an almost unceasingly excited voice.

Senior Katina Parker, the president of the Black Student Alliance, relates a similar experience.

"It was like a family reunion," she said of the march. "To have one million black people standing there right next to you made me feel like you've known them all your life."

Both Leach and Parker are black people who stand as examples of academic excellence - Leach is a junior at the university and Parker is a sophomore at the Million Man March. Their experiences illustrate the benefits of attending a historically black university.

The Million Man March was an unprecedented demonstration of black unity in its time when the focus of the national media was on the tumultuous elections of black men.

Throughout August, D.C. Sommer showed black was strength in its previous history of economic violence and institutionalized drug use. Two weeks ago a black activist from Denver, Denver Ward, was beaten and left dead on a bridge from a bridge.

Perhaps more disturbingly, the Washington-based Sammerton Project recently released estimates that one out of every three young black males are born before the age of 20, and 29 in 30 is not a pretty picture.

"It was like a family reunion to have one million black men together that seemed so right," said Katina Parker.

Organizers of the march believed that black people everywhere were in need of something positive, like an event that could unite their collective pride and rally them to their sense of dignity.

The Million Man March demonstrated a "day of attainment" at the major events of the march. Lorie Frankel, who had participated, explained.

"The march indicated the desire for balance between the two needs.

The march demonstrated the educational gains of why grade distribution has changed to reflect the demands of graduate school.

"It's hard to say if the changes are necessary to the demands of graduate school."

As questions will deal with past experiences with computerization, the changes are necessary to the demands of graduate school. According to Mitra, who had a slightly different perspective, the changes are necessary to the demands of graduate school.

Solutions to the problem of rising computerization, according to Spencer, are being sought.

This is one solution of the problem of rising computerization. One solution is the diffusion of the "black legislator" of computerization. "Bamboo" will be helpful to the faculty because it will be helpful to the faculty because it will be helpful to the faculty. To have one million black people standing there right next to you made me feel like you've known them all your life."

**Iceman discovered in Andes**

PERU - The frozen body of an iceman was discovered in the Peruvian Andes by the American archaeologist John Harpending. The 1950-year-old body, found on the summit of the Peruvian Andes, is the oldest known in the Americas.

Harpending and his team are now trying to determine the cause of the iceman's death and to learn more about the people who lived in the region at that time.

**ARCH plans for the future**

BY HEATHER MCGUIRE

The issue of race relations is a hot topic on campus this year. Many students are actively involved in various organizations and events, aiming to promote understanding and social change.

**Police Beat**

**Blaze**

By Marta Z. Bluma

The blaze, which started on the second floor of the Anderson Hall, was quickly extinguished by the campus fire department. No injuries were reported, and the cause of the fire remains under investigation.

**ARE YOU AN ASTHOMATIC?**

Do you currently suffer from wheezing, shortness of breath or difficulty breathing with exercise?

If you are a non-smoker and are at least 12 years of age, you may be eligible for a research study involving an investigational asthma medication.

Qualified volunteers will receive research-related medical treatment, study medication, and lab testing free of charge.

Study participants receive up to $650.00 financial compensation for participation.

For more information, call Piedmont Research Associates at 910-768-8062. If after working hours, please leave a message.

**MONO**

**If you have MONO or have had MONO in the last three weeks, you may have developed antibodies to this disease. These antibodies can be used to make MONO test kits.**

**EARN UP TO $400 in a month!**

Black political leader talks on race relations

Hearing from a political leader, the students at the University of North Carolina at Chapel Hill had a chance to learn about the importance of race relations. The speaker, William H. Gray III, the former executive officer of the United Negro College Fund, spoke to students and faculty at the Panther's Lecture series at the University of North Carolina at Chapel Hill. Gray's speech was a powerful reminder of the need for continued efforts to address racial issues. Gray spoke about the importance of recognizing the contributions of African Americans to the country and the need for continued efforts to address racial disparities. He emphasized the importance of education and lifelong learning in combating racism. Gray also encouraged the audience to be active in their communities and to work towards a more just and equitable society.
Students need working network

The Program Planning Committee of the Student Senate has decided that every incoming college student and every non-member of the Thespian Troupe will be required to complete at least one other activity while attending the university. And while the Thespian Troupe is the only club on campus to meet this requirement, the main purpose of the new program is to encourage students to become more involved in campus activities, regardless of their major or background.

And so, with the program officially underway, the committee is already seeing positive results. "We've had a great response so far," said committee chair, Sarah Johnson. "Students are really excited about the opportunity to get involved in something new and to meet new people."

The program is designed to be flexible, allowing students to choose from a variety of activities, including sports teams, clubs, and volunteer opportunities. "The goal is to make sure that everyone has an opportunity to find something they enjoy," said Johnson. "And we're seeing that happen."

One of the most popular aspects of the program has been the emphasis on diversity. "We want to make sure that all students feel welcome," said Johnson. "So we've included activities that appeal to a wide range of interests and backgrounds."

The program planning committee is already looking ahead to next year, planning new activities and initiatives to continue to engage students and encourage involvement. "We're really excited about what we've accomplished so far," said Johnson. "And we're looking forward to seeing what the future holds."
End the name-calling, please

ANDY FERGUSON

We, on the other hand, are con­vinced that the proper way to argue is in a civil manner, even when the topic is sensitive and involves the feelings of our commun­ity.

Furthermore, everyone should support this climate of debate and respect it.

Name-calling and immature behavior are not necessary, though, because they detract from our common good.

School makes cents, not sense

MATTHEW GILLEY

A university is a unique insti­tution that performs a central role in society. Its pro­ducts are concern to worry about the safety of the student or the campus, and the university has a compelling interest to provide a safe atmosphere.

To campus safety specifically, Wake Forest is a tough nut to crack. Crowded, the parking lot, the dorms, and the Great Hall are all safe havens for students. Moreover, the university has a strong safety record.

Unfortunately, the administration of this university is not as much concerned with keeping students safe as it is with maintaining its image. Therefore, a university does not make it as a safe environment to live in.

Furthermore, everyone should support the climate of debate and respect it.

Name-calling and immature behavior are not necessary, though, because they detract from our common good.

Hounded houses have nothing daily life at the university

ZACH EVANS

Age might be attempting a comeback here. I can walk around campus as if it were 1991 and no one will blink. There is a reason for this. The administration can be quite forgiving of those who wear any type of shirt.

Otherwise, as the next director of multicultural affairs, I would simply suggest that we all try to behave ourselves. We are the ones who vote for our representatives, and we should fight for our beliefs without trying to hurt the other, and more on making sure that we have a better place to live than students.

Two solutions

The Student Government serves as a liaison between the administration and all students. The role of the SG is to continually improve the campus climate and the services it provides to students.

In closing, I would like to emphasize that I am a student, not a representative of the administration. The SG is not expected to change the climate on its own, but I believe that the SG can help to improve it.

Reason for closing

To improve Wake Forest: the university must be more than just a place where students can study and get a degree.

While sharing many common goals, the primary motivation of the campus community is to improve the marketability of the university.

The likely reasoning for this is that the university has a history of not being able to attract the students that it wants, and this is why it needs to improve its image.

HAUNTED HOUSES

I have a small personal connection to the idea of haunted houses. When I was a child, my parents would take me to a haunted house every Halloween, and I have always been fascinated by the idea of ghosts and the supernatural.

However, I have never actually experienced a haunted house. I have never encountered a ghost or seen any strange phenomena. I have only heard stories about them.

But I do believe that there is some truth to the idea of haunted houses. I think that they can be a way of tapping into our collective unconscious, and they can be a way of exploring our deepest fears and desires.

The idea of haunted houses is also a way of exploring our relationship with death. When we think about death, we often think about it as something that is scary and terrifying, but I think that there is something else to it.

I think that death is a natural part of life, and it is something that we should be able to accept and come to grips with. I think that haunted houses can be a way of helping us to face our fears and to come to terms with death.

In the end, I think that haunted houses can be a way of tapping into our deepest fears and desires, and they can be a way of helping us to face our fears and to come to terms with death.

The men's soccer team is looking for relief and their fans are even more concerned. The Deacons faced Duke Wednesday night in a must-win game to stay in the ACC championship race. Although the Deacons lost 1-0, the team refused to give up and fought back to the final whistle. "We didn't give up," said Senior midfielder and co-captain Taylor Vidovich. "We pushed the ball down the field and finally got a chance to score in overtime." The Deacons took the lead early in the first half when they scored off a penalty kick. They continued to dominate the game, outshooting the Devils 11-8 and holding them to just one shot on goal. However, the Deacons were unable to convert their chances into goals and were forced to settle for a scoreless draw. "We wanted to win," said Coach Todd Goodridge. "But we didn't make the most of our opportunities." The Deacons are currently tied for third place in the ACC with 11 points, four behind Virginia and Virginia Tech. They need to win their remaining games to have a chance at the ACC title. "We have to win our last three games," said Goodridge. "It's not easy, but we're up for the challenge." The Deacons will face off against Wake Forest on Saturday, followed by Furman on Sunday. With the win, Wake Forest improved to 3-2-1 in ACC play and the Deacons fell to 3-3-2. "We have to get back to basics," said Goodridge. "We have to focus on our defense and our midfield play." The Deacons are currently in sixth place in the ACC standings, just one point behind Wake Forest. "We have to get back to our roots," said Goodridge. "We have to play with heart and determination." The Deacons will need to regroup quickly for their next game against Temple on Wednesday. "We have to be ready for whatever they bring," said Goodridge. "We have to be ready for a tough battle." The Deacons will need to win their last three games to have any chance at the ACC title. "We have to win our last three games," said Goodridge. "It's not easy, but we're up for the challenge." Triumvirate of Deacons shines in Pacific Palisades

By Brian Robison

The Deacons' tennis team continued its trend of fall upsets as members of the squad defeated the University of North Carolina at the Pacific Palisades Tournament. The Deacons entered the week as the No. 5 team in the nation, but fell to the No. 16 team from North Carolina in the first round.

The Deacons were able to win against the Tar Heels due to the efforts of several key players. Senior Kyra Sullivan earned the win at No. 1 singles, while sophomore Alex Strazzo earned the win at No. 2 doubles.

The win at Pacific Palisades was the first of the season for the Deacons and showed that the team is capable of competing with some of the nation's top teams.

Football travels to Chapel Hill, collects fifth conference setback of season

As has been the case for the Deacons football team this year, injuries have played a major role in yet another challenging season. The team has been dealing with a number of injuries to key players, which has hindered their ability to run and control the game.

The Deacons will take their show on the road again this weekend, traveling to Chapel Hill to face the Tar Heels. The game is scheduled for a 12:00 p.m. kickoff and is expected to be a tough test for the Deacons, who are looking to improve their conference record.

However, the team remains optimistic and is focused on making the most of each week. With the team's morale high, the Deacons are ready to take on the challenge of a new opponent and to continue their efforts towards building a successful season.
**ACCC**

From Page B1

The Dragons entered the season in 1959. The 52nd annual season will be remembered by fans as one of the most successful in the team's history.

Despite finishing fifth in the standings, the Dragons managed to reach the playoffs and faced strong competition in the quarterfinals. The team's success was due to the outstanding performances of several key players.

One of these players was Junior Joe Goodridge, who consistently performed at a high level and was instrumental in the team's success. Goodridge's leadership and determination contributed to the team's victory in the playoffs, cementing his place as one of the greatest players in ACCC history.

The Dragons men’s golf team finished second at the NCAA Division II National Championships in November. The team was led by senior captain Tim Goodridge, who was named the tournament’s Most Valuable Player. Goodridge’s performance was instrumental in the team’s success, as he shot a 72 in the second round to help secure the team’s second place finish.

Goodridge was not alone in his success, as several other team members also performed well. Junior Joe Goodridge contributed to the team’s victory with his strong play, while sophomore Patrick Smith finished with a 73 in the final round.

The Dragons’ success in the NCAA tournament is a testament to the hard work and dedication of the entire team. With impressive performances on the course, the Dragons were able to advance to the national championships and achieve a second-place finish.

Deep down, they're really good kids. They're just dealing with a lot of stress right now. So why not bring $5 and a valid college ID. to the Annex Coliseum this Friday at 7:30 and watch some talented young men try to walk the straight and narrow. And, if they slip up and commit an act considered a felony in most states, well, a little time in the corner should straighten them out. You naughty boys.

For more information, call 721-0098.
Filthy recordings bested by women

By BRINKLEY STARR

This week I went into Phantom Records Video & Video Planning to review an album by a male or mixed-gender group, and the lady at the counter selected 'Get Money.'

"What a single?" I thought, 'Get Money?'" is one of the most popular songs on the new album by the group called Miss Thang, and it's definitely not my kind of music. But before I had the chance to protest, she handed me the album.

"You should check this out," she said. "It's got some really amazing beats and some great vocals."

I took the album and headed home to listen to it. I was pleasantly surprised by the diversity of the group's sound. They have a unique blend of electronic and rap music that is both catchy and thought-provoking.

The album opens with five minutes of profanity, but strangled by it. The LP, 'Miss Thang,' is a hard-hitting album that is sure to be appreciated by fans of all ages.

The group's experimental approach to music is evident in their mix of rap, electronic, and pop music. They experiment with different sounds and styles, creating a fresh and innovative sound.

I would definitely recommend this album for anyone who is looking for a new and exciting sound in music. 'Miss Thang' is definitely a must-listen for fans of electronic and rap music.

Peppers make for simple fare

By Jim Davidson

This week's dish is stuffed peppers. The recipe is
fairly simple, but it can be improved by using people with
their backs to the kitchen.

You will need a skillet, a baking sheet, a pot (these
are not the only things you need), and a cutting board.
With this recipe for peppers, a sharp knife, a cutting board, and a
cooking bowl. If you use a cast-iron skillet, you will need a
grater.

Food You Use

1 tsp. of ground beef 1 tsp. of long-grain rice
1 cup of chopped vegetables, provision, cheddar
cheese, etc.
2 cups of mashed potatoes
1 small onion
1 garlic clove
1 egg
1/4 cup of ground dried peppers
1/2 teaspoon salt
1/4 teaspoon pepper
1/4 teaspoon thyme

Pepitas make for simple fare

You will need a skillet, a bowl of chopped vegetables, 
provision, cheddar cheese, etc.

Cook the rice in the pot according to package direc-
tions. For best results, use big rice. Uncle Ben's may have
been good with a little water, but he didn't know jack
about rice.

While the rice is cooking and the eggs are
boiling, shape the cheddar and chop the onion and garlic on any
butter knife.

Campus Cooking

Break the egg into the raining bowl. Don't let it
rain on the egg.

You are now the one in charge of the
egg. The rice is to the side, and the egg is
in the center.

Once all the stuffing ingredients have been thoroughly
mixed, now is the time to mix them together.
When the rice is boiling and the eggs are
boiling, stir in the rice and the egg.

You will need a plate to accomplish this place to
put a knife over one side of the skillet, so that just a small
silver bowl is exposed to the heat. Turn it in a
side, so that the grains dance through this side.

These peppers are a trick, or the Rambo-Blender
will be very happy to come and succotash your
peppers. If you use in the middle of the month, this way:
then, when you are ready to do the peppers, wash the
peppers on the baking sheet and bake for 15 minutes. You
Although North Carolina's music scene has started to blossom in recent years, manybands have yet to get much airplay on local radio, and some of the best bands have yet to gain much attention outside of the state. However, within the last few years, some local bands have finally started to emerge.

"We're happy to see that there is now a growing interest in local music," said Anna Thompson, a student at Wake Forest University. "It's great to be your own boss and have the freedom to create music that you love." Thompson is a member of the band Squatweiler, which has been performing around the Winston-Salem area since 1995.

Squatweiler is currently working on their third album, which they hope to release later this year. The band has been gaining a local following and has played several shows around the area.

According to Thompson, the music scene in Winston-Salem is growing, with more local bands emerging and gaining attention. "Our goal right now is to reach a wider audience and to get our music out there," said Thompson. "We want to continue to play and to keep growing as a band."  

Squatweiler's sound is a mix of punk and rock, with influences from bands like The Ramones and The B-52s. The band's lyrics often deal with social and political issues, and they use their music as a way to make a statement.

The band's upcoming album will feature a mix of original songs and covers, including songs by bands like U2 and The Clash. "We want to continue to grow as a band and to keep experimenting with our sound," said Thompson. "We're excited to see where this music will take us."  

Squatweiler's upcoming album is just one example of the growing music scene in Winston-Salem. With more local bands emerging and gaining attention, the future looks bright for the local music scene in Winston-Salem.
You are not a mooch. But when a hole in your pocket renders you changeless, you reluctantly call the folks collect.
You dial 1800 CALL ATT.
Your pangs of guilt are minimal.

1800 CALL ATT always costs less than 1800-COLLECT.
Always works from any phone. And always gets you the reliable AT&T Network. For if someone were to call you, we'd stop.

*For interstate calls. Promotions excluded. 1-800-COLLECT is a registered trademark of
