The night

The night the night has eyes they say
The night has only one but

The night says and we the brightest
day

Do we

The eyes of night

When there is work to be
done when there is work to be done

at the fresh of dawn we rest
days we spend in dreaming

much is done that
does not last when just the lights are The
Eye of the day is clear and bright
Eye that day is clear and bright
Clear and bright for all can see

Close her eyes she can't no more see
Don't be blind be blind
even the night can be blind

But the night can be blind
Blind can be blind be blind
The night can be blind
