Construction will begin in August and should be completed by September 1985. In order for the plan to be implemented, several other minor alterations in the campus will be necessary. The newly constructed entrance will have to be developed, but will be replaced by the city. In addition, the president's residence will be removed and placed behind the physical plant building.

The Rapek Signes, Fikes Pu, Della Signes Pu, Fikes Pu, and Eupi Signes Alpha Assembly houses, plus the university house and the dorm buildings will be demolished to make room for the new line of traffic. The large parking lot by Finks field will be used as a temporary lot for students and faculty.

The announcement was greeted with joy and faculty will be kept in a minimum.

The survey of the school population will be an important concern. Students are being surveyed to see how the new plan will affect them.

According to Kurns, the plan was originally presented by the university's facilities department as a way to upgrade the audio-visual capabilities of the campus. However, after further discussion and consultation with the university's planning and placement staff, the decision was made to proceed with the project.

Kurns emphasized that the new system will not only improve the audio-visual capabilities for teaching and learning, but also enhance the overall campus experience for students, faculty, and visitors.

The new systems will be installed in all academic buildings and will be capable of supporting a variety of uses, from lectures and presentations to multimedia events and musical performances.

Kurns also noted that the project is expected to be completed by the end of the academic year, and that the university is committed to ensuring that all necessary preparations are made to ensure a smooth and successful implementation.

The announcement of the project has been met with widespread positive reactions from students, faculty, and alumni, who have praised the university for its commitment to providing state-of-the-art facilities and resources for its community.

Kurns concluded by expressing his gratitude to all those involved in the planning and implementation of the project, and by encouraging everyone to look forward to the many benefits that the new systems will bring to the campus.

However, the school's action to the speech was approved by the administration, based on their Russian language, and showed up cheering for Gorbachev.

The college democrats complained loudly to John Von Bernack, vice president for everything, who was enthralled some about the whole deal. "I think we should evacuate who the characteristic and the head were representing the school or Gorbachev. I don't know the answer, but that's the line."

As usual, most students didn't have much about the event or anything else. "Just another day in the hum drum life," said an anonymous volunteer.

No comment from Kurn

Student Government called a board meeting last Thursday and approved a resolution that would make each member of the SG present to the meeting instead of one at a time. This resolution would make it difficult for any member to leave before the meeting was complete. The resolution was passed unanimously by the board and went on to be vetoed by Vice President Stuart, vice president of everything, who approved the bill and was pleased by the performance of SG.
